hitch is a little bit different It's like a knot but it generally involves another object like a stick a post a ring or occasionally another rope Properly tied hitches can hold their place or they may be able to slide depending on the hitch you choose A lashing is like a hitch but slightly more complex Lashings involve the use of a rope or similar material to secure two or more objects together To grossly oversimplify all this the knot is just rope fastened together the hitch is a rope fastened to an object and a lashing is a rope fastening multiple objects together A good knot can save lives when you're dealing with a survival situation performing first aid and when working over heights or water But you have to know how to tie it So make sure you know what to do with your rope the next time you head into the wild by learning these 20 essential knots
