The Medieval World:

The Medieval World Peter Linehan, Janet L. Nelson, 2013-09-13 This groundbreaking collection brings the Middle Ages to life and conveys the distinctiveness of this diverse constantly changing period. Thirty eight scholars bring together one medieval world from many disparate worlds from Connacht to Constantinople and from Tynemouth to Timbuktu. This extraordinary set of reconstructions presents the reader with a vivid re-drawing of the medieval past offering fresh appraisals of the evidence and modern historical writing. Chapters are thematically linked in four sections: identities, beliefs, social values and symbolic order, power and power structures, elites, organizations and groups. Packed full of original scholarship, *The Medieval World* is essential reading for anyone studying medieval history.

A Companion to the Medieval World Carol Lansing, Edward D. English, 2012-10-11 Drawing on the expertise of 26 distinguished scholars, this important volume covers the major issues in the study of medieval Europe, highlighting the significant impact the time period had on cultural forms and institutions central to European identity. Examines changing approaches to the study of medieval Europe, its periodization and central themes. Includes coverage of important questions such as identity and the self, sexuality and gender, emotionality and ethnicity, as well as more traditional topics such as economic and demographic expansion, kingship and the rise of the West. Explores Europe's understanding of the wider world to place the study of the medieval society in a global context.

The History of the Medieval World Susan Wise Bauer, 2010-02-22 A masterful narrative of the Middle Ages when religion became a weapon for kings all over the world. In her earlier work *The History of the Ancient World*, Susan Wise Bauer wrote of the rise of kingship based on might. But in the years between the fourth and twelfth centuries, rulers had to find new justification for their power and they turned to divine truth or grace to justify political and military action. Right began to replace might as the engine of empire. Not just Christianity and Islam but also the religions of the Persians, the Germans and the Mayas were pressed into the service of the state. Even Buddhism and Confucianism became tools for nation building. This phenomenon stretching from the Americas all the way to Japan changed religion but it also changed the state. *The History of the Medieval World* is a true world history linking the great conflicts of Europe to the titanic struggles for power in India and Asia. In its pages El Cid and Guanggaeto, Julian the Apostate and the Brilliant Emperor Charles the Hammer and Krum the Bulgarian stand side by side. From the schism between Rome and Constantinople to the rise of the Song Dynasty from the mission of Muhammad to the crowning of Charlemagne, from the sacred wars of India to the establishment of the Knights Templar, this erudite book tells the fascinating, often violent story of kings, generals and the peoples they ruled.
