**The Routledge Companion to Photography Theory** Mark Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today this companion tackles some of the most pressing questions about photography theory's direction relevance and purpose This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory Having assimilated the histories of semiotic analysis and post structural theory critiques of representation continue to move away from the notion of original and copy and towards materiality process and the interdisciplinary The implications of what it means to see an image is now understood to encompass not only the optical but the conceptual ethical and haptic experience of encountering an image The fractal is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to photographs and lend nuances to what essentially underlies any photography theory that is the relationship of the image to the real world and how we conceive what that means Diverse in its scope and themes The Routledge Companion to Photography Theory is an indispensable collection of essays and interviews for students researchers and teachers The volume also features extensive images including beautiful colour plates of key photographs

viewed as falling short of their supposed function as vessels of memory and at times even denounced as devices that distorted memories How does photography participate in the formation and maintenance of collective identities and shared memory discourses from the family to the nation Furthermore how can we begin to conceptualize photography's effects on the historical imagination of individuals and groups Double Exposure endeavors to answer these questions by calling attention to the variety of contexts in which images circulate and to the narratives from which they spring and which they in turn shape This is the latest volume in Transaction's Memory and Narrative series      **Photographic Times** ,1890
