The Military Staff Its History And Development:

    ˜Theœ military Staff James D. Hittle,1975   *The Military Staff* Br.-Gen. James D. Hittle,2020-05-08 This book explores the history of military staff positions and the evolution of military staff throughout history While the average military reader has a reasonably clear understanding for instance of how artillery cavalry or aviation has developed few individuals have a definite idea of the historic significance of military staffs To some the staff and the manner in which it does its work is merely a device contrived by writers of school texts and field manuals for academic purposes Actually such views are not substantiated by historical facts The staff system has a history and development as well defined as any of the phases of the military art Just as infantry or the other arms experienced continuous changes and improvements the staff has also undergone constant evolution The staff doctrine of modern armies is no modern invention it is the cumulative result of a long evolutionary process Most persons can better appreciate a thing when they know the steps by which it came into being It is for those that these pages have been written   **The Military Staff** James Donald Hittle,L. DeWitt,2012-06-01   **The military staff : its history and development. [ed ed.].** James Donald Hittle,   Military Education and the British Empire, 1815–1949 Douglas E. Delaney,Robert C. Engen,Meghan Fitzpatrick,2018-09-15 Common military education was the lifeblood of the armies navies and air forces of the British Empire It permeated every aspect of the profession of arms and was an essential ingredient for success in both war and peace Military Education and Empire is the first major scholarly work to address the role of military education in maintaining the empire throughout the nineteenth and twentieth centuries Bringing together the world s top scholars on the subject this book places distinct national narratives Canadian Australian South African British and Indian within a comparative context The contributors examine military education within the British Empire as a generator of institutional knowledge as a socializing agent and as an enhancer of interoperability This volume is the first to examine military education from a transnational perspective which allows readers the opportunity to consider the connections between education and empire   The Sinews of War James A. Huston,1966   **Educating Air Forces** Randall Wakelam,David Varey,2020-12-01 Compared to armies and navies which have existed as professional fighting services for centuries the technology that makes air forces possible is much newer As a result these services have had to quickly develop methods of preparing aviators to operate in conditions ranging from peace or routine security to full scale war The first book to address the history and scope of air power professionalization through learning programs Educating Air Forces offers valuable new insight into strategy and tactics worldwide Here a group of international experts examine the philosophies policies and practices of air service educational efforts in the United States France Italy Germany Australia Canada and the UK The contributors discuss the founding successes and failures of European air force learning programs between the Great War and World War II and explore how the tense Cold War political climate influenced the creation curriculum and results of various programs They also consider how educational programs are adapting to soldiers needs and the demands of modern

warfare Featuring contributions from eminent scholars in the field this volume surveys the learning approaches globally employed by air forces in the past century and evaluates their effectiveness Educating Air Forces reveals how experiential learning and formal education are not only inextricably intertwined but also necessary to cope with advances in modern warfare   *A Command Post at War* David W. Hogan,2000 Discusses the first Army headquarters in the European theater from its activation in October 1943 to V E Day in May 1945 Shows the Army headquarters of World War 2 as a complicated organization with functions ranging from the immediate supervision of tactical operations to long range operational planning and the sustained support of frontline units CMH Pub 70 60   *Air Science: v. 1. Johnston and the Defense of Richmond** Steven H. Newton,1998 Focusing on the period between mid February and late May 1862 Newton examines in detail the high level conferences in Richmond to set strategy and the relationship of the Peninsula campaign to operations in the Shenandoah Valley and the western Confederacy By examining what Joseph E Johnston actually accomplished rather than speculating on what he might have done Newton shows that his overall conduct of the campaign holds up well under scrutiny Jacket   *Air Science: Fundamentals of global geography* United States.
