The Of Lists:

The Charm of a List Lucie Doležalová, 2009-01-14 Lists one of the most archaic literary genres stand behind many of our complex mental or rhetorical structures and they often influence the way we conceptualize the world even if we are unaware of it They seem plain but may conceal a complicated inner logic They are agrammatical but may tell a story Their basic features selection order and layout may be enough to give them enormous power by including they exclude by ordering they create a hierarchy by taking on particular physical aspects they place themselves into a specific context These and other issues are discussed in the present transdisciplinary volume collecting the best revised contributions to a workshop on lists held at the Center for Theoretical Study in Prague in November 2008 Each of the 13 articles by researchers from seven countries provides a case study on the subject of list The fields covered include late antique medieval and early modern history philology philosophy cognitive and computer science The contributors aim both at presenting particular cases specific lists or list types and at the same time at addressing methodological issues exploring the ways of researching lists in their particular disciplines formulating relevant research themes and questions contextualizing the subject Since theoretical discourse on lists has not been established yet this volume should be seen as a first step in the process showing the variety of possible research directions on a transdisciplinary level and raising interest in the topic which although it may seem a bit obscure at first has indeed a lot to offer *The Oxford Handbook of Comparative Cognition* Thomas R. The Concept of History Dmitri Nikulin, 2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out It is a critique of the modern understanding of history that presents it as universal and teleological progressively moving forward to an end Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history the remnants of these positions still affect our understanding of history But if history is not universal and singular evolving toward an objective universal end it should be possible to admit of multiple histories some of which we appropriate as our own An another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from its inception in antiquity The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history
