The Of The Dead Man:

The Material of Poetry Gerald L. Bruns, 2005 Poetry is philosophically interesting writes Gerald L Bruns when it is innovative not just in its practices but before everything else in its poetics that is in its concepts or theories of itself In *The Material of Poetry* Bruns considers the possibility that anything under certain conditions may be made to count as a poem By spelling out such enabling conditions he gives us an engaging overview of some of the kinds of contemporary poetry that challenge our notions of what language is sound poetry visual or concrete poetry and found poetry Poetry's sense and meaning can hide in the spaces in which it is written and read says Bruns and so he urges us to become anthropologists to go afield in poetry's social historical and cultural settings From that perspective Bruns draws on works by such varied poets as Gertrude Stein Ezra Pound Steve McCaffery and Francis Ponge to argue for three seemingly competing points First poetry is made of language but is not a use of it That is poetry is made of words but not of what we use words to produce concepts narratives expressions of feeling and so on Second as the nine sound poems on the CD included with the book demonstrate poetry is not necessarily made of words but is rooted in and in fact already fully formed by sounds the human body can produce Finally poetry belongs to the world alongside ordinary things it cannot be confined to some aesthetic neutral or disengaged dimension of human culture Poetry without frontiers unmoored from expectations and sometimes even written in imaginary languages Bruns shows us why for the sake of all poetry we should embrace its anarchic vitalizing ways

The Weight of Images Katariina Kyrölä, 2016-02-17 *The Weight of Images* explores the ways in which media images can train their viewers' bodies Proposing a shift away from an understanding of spectatorship as being constituted by acts of the mind this book favours a theorization of relations between bodies and images as visceral affective engagements that shape our body image with close attention to one particularly charged bodily characteristic in contemporary western culture fat The first mapping of the ways in which fat gendered bodies are represented across a variety of media forms and genres from reality television to Hollywood movies from TV sitcoms to documentaries from print magazine and news media to online pornography *The Weight of Images* contends that media images of fat bodies are never only about fat rather they are about our relation to corporeal vulnerability overall A ground breaking volume engaging with a rich variety of media and cultural texts whilst examining the possibilities of critical auto ethnography to unravel how body images take shape affectively between bodies and images this book will appeal to scholars and students of sociology media cultural and gender studies with interests in embodiment and affect
