The Orb:

The Orb Project Klaus Heinemann, Miceal Ledwith, 2007-11-06 After literally stumbling into orbs appearing as bright as light bulbs in photographs he was taking at a spiritual retreat Dr Klaus Heinemann immediately sensed that he was onto something profound There was no choice but to convince himself that his notion was on solid grounds Heinemann looked at thousands of pictures he had taken earlier and thousands more would be taken to test the hypothesis that these light circles are nothing less than emanations from Spirit beings Dr Miceal Ledwith had a similar experience after the orb phenomenon was first made known to him through the teachings of Ramtha He began an intense and systematic study of orbs in all sort of situations day and night and in all sorts of atmospheric conditions in order to discover all he could about their nature the situations in which their presence could be most easily detected and what implications they might have for our understanding of our own place in the cosmos To date he has amassed a collection of well over 100 000 images In The Orb Project Ledwith and Heinemann present their fascinating discoveries along with practical tips that amateur digital photographers can use to photograph orbs and properly distinguish them from false orbs that are really dust or water particles They offer guidelines on deciphering the orbs various patterns features and characteristics based on their extensive research As Dr Ledwith points out once you develop a keen and sustained interest in photographing spirit entities some quite interesting things begin to happen the brain stops censoring these images and you can begin to see with orbs with the naked eye in more color and detail than is visible to even a digital camera Ledwith and Heinemann also explore communication with orbs and what their existence means to our lives The implications of a realization that we are surrounded by a cloud of witnesses are enormous and incredibly hopeful for the world at large

Boundary Stelae Of Akhentaten William J. Murnane, Charles C. Van Siclen III, 2012-11-12 First published in 1993 This is a new edition of Akhenaten's boundary stelae which now includes information about most of the boundary markers the tablets were accompanied by statues of Akhenaten Nefertiti and two of their daughters all of which stood on low platforms that were raised above the level of the floor In addition was the awareness that the statues at the site of Stela A were elevated to a greater degree than were the corresponding statues at other sites insofar as this could be judged from published photographs The evidence in the publication indicated moreover that Stela A along with Stela B some two miles south were the latest of the boundary monuments to be inscribed since both concluded with a colophon dated to the end of Akhenaten's eighth regnal year added to the standard text of the Later Proclamation found on these and other stelae of this series
