world's arid land **The Sagebrush Curtain** Melvin Adams, 2019-08-08 This book contains a diversity of natural and human stories about the southeast quarter of Oregon state an area seemingly empty and barren to many people driving through it. This surprising view of the region features the botany, geology, wildlife and history of the area wrapped in a memoir of the author's youth spent there. Born in the sagebrush community of Lakeview in 1941 the author moved on following high school graduation. But as with many native sons and daughters from out of the way places the urge to return to his roots proved irresistible. I endeavored to write this collection about the Oregon desert because of my childhood there says Adams but also because it is a place of startling mystery subdued danger and beauty **Artists Activating Sustainability** Barbara Sellers-Young, 2022-10-11 *Artists Activating Sustainability: the Oregon Story* examines the way in which the artists within specific communities against the background of landscape and history reveal concepts of sustainability that help us broaden our knowledge of what is needed to create a sustainable world *Owyhee Canyonlands Wilderness Designation (OR, ID, NV)*, 1989 **Owyhee Canyonlands Wilderness** United States. The Desert's Past presents the first complete synthesis of the environmental and human history of North America's Great Basin. Centering on Nevada this region covers some 165 000 square miles and includes substantial parts of California, Oregon and Utah. The Great Basin takes its name from the fact that its rivers flow inward rather than to the sea. Offering an encyclopedic scope with a storyteller's tone Donald K Grayson recounts the historical development of the Great Basin. Beginning just before the last maximum advance of glaciers in North America the author reconstructs the Great Basin's defining environmental features. He catalogs the existence of such mammals as lions, camels and mammoths that once lived in this region and discusses the rise and fall of huge lakes that were once found here. He also characterizes some 11 500 years of human history within the Great Basin and shows that this history is inseparably linked to the past environments of this region. Whether revealing the wonders accumulated by ancient packrats discussing the advent of European influence and disease or tracing the origin of the Bonneville Salt Flats where virtually all landspeed records have been set Grayson's compelling narrative recreates the world of the Great Basin.
