## **B737 Systems Guide:**

*The Boeing 737 Technical Guide* Chris Brady, 2017-06-08 This is an illustrated technical guide to the Boeing 737 aircraft. Containing extensive explanatory notes, facts, tips, and points of interest on all aspects of this hugely successful airliner and showing its technical evolution from its early design in the 1960s through to the latest advances in the MAX. The book provides detailed descriptions of systems, internal and external components, their locations and functions, together with pilots' notes and technical specifications. It is illustrated with over 500 photographs, diagrams, and schematics. Chris Brady has written this book after many years developing the highly successful and informative [www.b737.org.uk](http://www.b737.org.uk) technical website, known throughout the world by pilots, trainers, and engineers as the most authoritative open source of information freely available about the 737.

**Instructional Models in Computer-Based Learning Environments** Sanne Dijkstra, Hein P.M. Krammer, Jeroen J.G. van Merriënboer, 2013-11-11 In the last decade there have been rapid developments in the field of computer-based learning environments. A whole new generation of computer-based learning environments has appeared, requiring new approaches to design and development. One main feature of current systems is that they distinguish different knowledge bases that are assumed to be necessary to support learning processes. Current computer-based learning environments often require explicit representations of large bodies of knowledge, including knowledge of instruction. This book focuses on instructional models as explicit, potentially implementable representations of knowledge concerning one or more aspects of instruction. The book has three parts relating to different aspects of the knowledge that should be made explicit in instructional models: knowledge of instructional planning, knowledge of instructional strategies, and knowledge of instructional control. The book is based on a NATO Advanced Research Workshop held at the University of Twente, The Netherlands, in July 1991.
