Theory and Practice of Model Transformations Laurence Tratt, Martin Gogolla, 2010-06-29 Model transformations are the glue that tie modelling activities together If you've used modelling in anger then whether you know it or not you've used model transformations They come in all shapes and sizes from moving models between different tools to generating implementations Model transformations have humble beginnings at one point not long ago it was said by many in the know that the way forward in model transformations was to use XSLT That this idea now raises a wry smile shows how far the model transformation community has come in a short time Where once model transformations were hacked together in a variety of unsuitable languages we now have a number of powerful dedicated languages and theories at our disposal Since 2008 the ICMT conference series has played a huge part in advancing the subject and this third edition was no different The theories and languages presented at ICMT have allowed principled model transformations to play an ever greater part in real systems Of course there is still much more to do we need our model transformations languages and theories to scale further allow greater expressivity be more extensible and aid reusability and we lack empirically backed studies of model transformations in use Doubtless you can think of other gaps Yet though some real world challenges lie just beyond our reach each year sees once daunting problems conquered Much of that progress is now driven by ICMT and this year's edition showed how model transformations are increasingly being used in previously unfamiliar areas

The Principles of Transformation Ebenezer Acheampong Addo, 2015-05-28 We are all influenced by our environment and by everything in it It is easy for some

plants to prosper and bear much fruit under certain environmental conditions but other plants need different climatic conditions This truth is also valid in relation to human beings The environment you live in has a bearing on your altitude and your performance Achievement or success in any area is a function of many factors including your environment and prevailing circumstances Therefore prevailing conditions can either inhibit or enhance your performance and subsequently your success However factors such as knowledge wisdom skill and attitude can override the outcome of a negative environment or circumstances For example gravity is a fact of life but birds overcome gravity all the time by flapping their wings Therefore they are able to fly for sustained periods without falling to the ground In the same way the application of the right combination of knowledge skill and determination can transform any circumstance This book deals with six timeless mathematical principles with strong biblical foundations to help anyone or any group transform its present state into a more desirable one

Periagoge - Theory of Singularity and Philosophy as an Exercise of Transformation Guido Cusinato, 2023-11-07 This book returns to the question at the center of our existence a question that the narcissistic culture in which we are immersed systematically tends to remove Why The underlying thesis is that the answer must not be sought in success or social recognition but in a fragment of truth hidden somewhere inside each of us which reveals itself only if we detach ourselves from our ego and its certainties It is not therefore a matter of finding yet another philosophical theory of the meaning of existence but rather of shedding light on the conditions under which such meaning can emerge The author shows us that the ultimate source of our existential orientation lies in the affective sphere and that the current crisis of orientation is derived from the atrophy of the process of affective maturation on a large scale and from a lack of knowledge and experience about which techniques are best to reactivate it We are like glowworms that had once unlearned how to illuminate and have since begun to hover around the magic lantern of the ascetic ideal already criticized by Nietzsche and then around neon advertising signs We are glowworms that have forgotten that we have within our own affective structure a precious source of orientation The basic thesis is that this source of orientation can be reactivated through the care of desire and practices of emotional sharing
