

## **COSMOLOGY (YUZHOUXUE): Mythology of Metaphysics**

Taoist divination, a metaphysical application of an eternal philosophy (internal) of nature (cosmic integrity), is built upon the foundation of cosmology (external) (the study of the origin and structure of the universe), which describes the myth of creation and its living process through unfolding mathematical-numerological structures. Cosmology represents the physical (earth) aspect of creation, particularly pertaining to the human being (taoist). Philosophy represents the spiritual (heaven) aspect of the method (tao). Both cosmology and philosophy combine to form the metaphysical application, which represents the emotional (human) aspect of the written cosmic code (Yijing).

The philosophy of Tao is simple, live in harmony (integrate) with nature by following it. Following it required observing the wave patterns (movement phases) of nature. These patterns, perceived as various reductions of the vast spectrum of vibratory frequencies, provide the blueprints for intuitive interpretation of divination and a direction for remedial action. The Taoists, superb observers of nature, had already applied theories of relativity and cosmology accepted in modern quantum mechanics [trans., the study of natural quantities in motion] over 5000 years ago (see appendix 'Quantum Tao').

Taoism synthesized its indigenous natural philosophy with Confucian and later Buddhist ideologies. The hierarchical (pyramidal) social structure of Confucianism is remarkably similar to that of the Sumerians. The Buddhist inputs subjective experiences, specific to its tradition, into a Hindu cosmology, which descended from the Hurrian (upper Euphrates river) and Hittite (Asia Minor) traditions of Mesopotamia (Hearn-Tatt) (Sitchin). Therefore, it is important to become familiar with the older influences of foreign cosmological systems (i.e. Tantra, Kabballah; Sumerian), which may provide missing details of its original meaning. Therefore, this section will incorporate trans-cultural mathematical perspectives in order to express the deep inherent meaning of Taoism. The natural philosophy of Taoism can assume all forms or none, thus all other philosophies, religions, or sciences can fit into its multi-scoped cosmological system. These similarities support the historical speculations of one origin for all civilizations, one ancient global civilization, and similarity in human metaphysics.

### **ORIGINS OF MYTHOLOGY: Prehistoric Antiquity**

Taoist divination is based on a mythological cosmology, which was imported into China via migrational waves from Mesopotamia, the original civilization (see below). Most likely, the first significant insertion of Sumerian tradition occurred in remote antiquity (c.2200 BCE) via the city-state of Harran (of the Hurrian people). Located on the upper Euphrates river on a land route (later called the Silk Road) that connected the Mediterranean Sea with the Far East, Harran was considered a major religious center and crossroads for trade.

Even though according to the Bamboo Annals Chinese civilization began in the Yellow River (Huang He) basin with the Xia Dynasty (c.2200 BCE), Chinese mythology, or its legendary remote antiquity period, parallels Sumerian mythology, which begins with the creation of the cosmos. Parallels can also be found in pantheon cosmology, numerology and mathematics, language and writing, the calendar, ritual, architecture and art, and the search for immortality (alchemy), not only with the Chinese but other cultures outside of Sumeria. (see appendix 'Parallels of Chinese and Sumerian Cosmology/Mythology').

Since the mythologies of migratory peoples (Sumerians) are essential to the cosmology, on which divination and alchemy is founded upon, the mythology of prehistory should be considered as possible historical fact. Furthermore, conjunctive research of modern science has confirmed the validity of various ancient legends of Sumeria particularly those pertaining to astrophysics and geophysics (i.e. creation of the solar system). Modern science, particularly the field of quantum physics, has reached the point of advancement where it breaks down and merges with mysticism.

### **Migrations from Mesopotamia into China: Cultural Origins (Hearn-Tatt)**

The migration theory states that the Chinese descended from the Bak people in Babylon (Greek: Chaldea) and migrated out of Akkad (Oldest Sumer) in Mesopotamia through Khotan in Turkestan via the Old Silk Road into northern China. This migration took place after the decisive battle between Huangdi and Chiyou in the war of gods and monsters.

**Myth and Metaphysics** W.A. Luijpen, 2012-12-06 This book is an attempt to interpret man's religious existence an interpretation for which some of the groundwork was laid by the author's book **PHENOMENOLOGY AND ATHEISM** Duquesne University Press 2nd impression 1965 That work explored the denial of God by the leading atheists and came to terms with the most typical forms assumed by their denials. Nevertheless I am not an adherent of atheism. The reason why it is possible to agree with many atheists without becoming one of them is that man can misunderstand his own religiousness or lapse into an inauthentic form of being a believer. What many atheists unmask is one or the other form of pseudo religiousness which should be unmasked. On the other hand I have also constantly refused to identify religiousness with such inauthentic forms and to define it in terms of those forms just as I refuse to identify the appendix with appendicitis the heart with an infarct the psyche as a disturbance and marriage as a fight. The book offered here has been written since the rise of the radical God is dead theology. This theology without God has often been presented as the only form of theological thought still suitable for modern man. As the reader will notice I reject the brash facility with which some modern men measure the relevance of anything by its modernity.

**Greek Studies in the Philosophy and History of Science** P. Nicolacopoulos, 2012-12-06 Our Greek colleagues in Greece and abroad must know indeed they do know how pleasant it is to recognize the renaissance of the philosophy of science among them with this fine collection. Classical and modern technical and humane historical and logical admirably original and respectfully traditional these essays will deserve close study by philosophical readers throughout the world. Classical scholars and historians of science likewise will be stimulated and the historians of ancient as well as modern philosophers too. Reviewers might note one or more of the contributions as of special interest or as subject to critical wrestling that ancient tribute we will simply congratulate Pantelis Nicolacopoulos for assembling the essays and presenting the book and we thank the contributors for their works and for their happy agreement to let their writings appear in this book.

R S C xi INTRODUCTORY REMARKS

Neither philosophy nor science is new to Greece but philosophy of science is. There are broader socio historical and more specific academic reasons that explain to a satisfactory degree both the under development of philosophy and history of science in Greece until recently and its recent development to international standards. It is perhaps not easy to have in mind

the fact that the modern Greek State is only 160 years old during quite a period of which it was considerably smaller than it is today its present territory having been settled after World War II *Popping the Metaphysical Myth* John Skalko,2025-02-22 In the debate over assisted suicide it is popularly assumed that most arguments against the practice are religiously based This book challenges that narrative by showing that four arguments compatible with an agnostic point of view concerning the existence of God and the afterlife entail a rejection of assisted suicide First assisted suicide is only good for the patient if they are actually made better or at least not worse off than before But how can you be better off if you don't exist anymore An adequate assessment about the logical possibilities of the afterlife then must be made and most entail rejecting assisted suicide Second suicide contagion is real Studies have found that legalizing assisted suicide has increased regular cases of suicide Third there is a misunderstanding about the category of relations Fourth many of the arguments in favor of assisted suicide often entail abhorrent practices If you're open minded about the afterlife or wondering whether assisted suicide is good for society this book is for you This book is a must read in any course of study treating the morality of suicide physician assisted suicide and euthanasia Assuming an agnostic stance regarding the existence of God and an afterlife Dr Skalko argues convincingly that it is more probable that suicide is not a rational response to severe human suffering Contra the popular quality of life model of medical ethics Dr Skalko also shows that suffering isn't the greater or greatest evil in the debate Daniel C Wagner PhD Associate Professor Chair of Philosophy Aquinas College

to the sort of knowledge specialists in the empirical sciences have or that the kind of knowledge mathematicians have although apparently about objects such as numbers sets and so on isn't really about those sorts of things at all Jody Azzouni argues that mathematical knowledge is a special kind of knowledge that must be gathered in its own unique way He analyzes the linguistic pitfalls and misperceptions philosophers in this field are often prone to and explores the misapplications of epistemic principles from the empirical sciences to the exact sciences What emerges is a picture of mathematics sensitive both to mathematical practice and to the ontological and epistemological issues that concern philosophers The book will be of special interest to philosophers of science mathematics logic and language It should also interest mathematicians themselves
