Microwave Ovens Reed,2014-08-01 Did you know the microwave oven was actually invented by mistake While experimenting with electricity a scientist noticed the chocolate snack he had in his pocket actually melted This led to the technology that has made cooking faster more convenient and used more than conventional cooking This book addresses the differences between a standard oven which uses conduction and a microwave oven which uses microwaves causing food molecules to move creating heat The more the molecules move the hotter the food gets So pop in a snack set the timer and in a few seconds you ll be ready to enjoy This book will allow students to plan and conduct an investigation to determine the effect of placing objects made with different materials in the path of a beam of light *Microwave Cooking and Processing* Charles R. Buffler,2013-07-01 The general public first started taking notice of the microwave oven in 1975 when sales volume for the first time exceeded 1 000 000 units per year In 1985 ovens were owned by over 50070 of U S households and food compa nies were developing microwavable products in earnest During this period microwave product developers found that very little information was avail able to assist them with their task Microwave ovens utilized a technology that was completely different from conventional and well understood cook ing procedures The interaction of microwaves with foods behaved in a mysterious fashion and product development was at best guesswork and at least trial and error This lack of knowledge of both the microwave oven and microwave food interaction spurred the development of this text Microwave technology was developed du ring World War 11 when the best scientists in the United States were cloistered at the radiation labora tory at MIT In the 1940s virtually all the technology that could impact the microwave oven was developed and well understood The problem was in the translation of this decades old knowledge to rules and techniques to be used for food product development Early authors such as P schner and Copson wrote texts primarily on applications to industrial processing This knowledge lay fallow as these texts went out of print *Results of the 1970 Microwave Oven Survey* LaVert C.
