Jorissen,P.J. Stallen,2013-04-17 Quantified Societal Risk and Policy Making is the result of an international workshop on societal risk organized by the Dutch Ministry for Transport Public Works and Water Management with additional financial support from the Directorate for Transportation DG VII of the European Union Managing risks whether there is a strong man made or natural component basically means assessing alternative options under uncertainty The possibility of multiple fatalities is one of the factors that can vary between options This volume is concerned with one particular type of risk the risk of death of a number of people in one accident and with one particular tool probabilistic risk analysis as they are developing in various domains of society nowadays Generally this risk is labelled societal risk This book shows how such comparisons are shaped at present in various hazard domains such as flood protection location and physical planning of industry transportation of chemicals and prevention of aircraft accidents It examines how to represent aggregate risks from major hazards in ways that can be handled by policy makers The purpose of the book is to increase the awareness

of societal risk disseminate available knowledge of existing approaches and exchange information on applications from various domains Quantified Societal Risk and Policy Making should be of interest to all those professionally concerned with defining the optimal separation between hazardous activities and equally desirable developments nearby   *The Darwin Effect* Dr. Jerry Bergman,2014-08-01 Dr Miklos Nyiszli an imprisoned doctor in the Auschwitz camp wrote that Nazi doctors hoped studying twins would solve the problem of faster reproduction of superior races Nazis hoped to have each German mother bear as many twins as possible What Darwin influenced went far beyond the Nazi death camps Shocking political social and scientific legacies of Darwin and his family Disturbing disclosure of how over 45 million Christians were killed in the 20th century because of their faith Revealing and layman friendly presentation This book is the result of 30 years of research and study carefully documenting the common destructive threads that tie some of history s most murderous dictators uncaring capitalists and aggressive social activists to the flawed concepts of Charles Darwin in an effort to change the world and how they succeeded The extermination of races considered lower than others the profound lack of empathy for less advanced cultures the corrupted atheistic justifications for taking the lives of millions all done to advance the agendas of social Darwinism at work in the world today More than mere theoretical discussions we have seen the horrifying evidence of the practical results when applying these destructive and misleading concepts to society in the last 100 years   **Affective Touch and the Neurophysiology of CT Afferents** Håkan Olausson,Johan Wessberg,India Morrison,Francis McGlone,2016-10-14 CT afferents are receptors in mammalian hairy skin that fire action potentials when the skin is touched lightly which makes them particularly important in affective touch Traditionally neuroscientific research has focused on more discriminative and haptic properties of touch that are mediated by large myelinated afferents and the coding properties and functional organization of unmyelinated CT afferents have been studied much less The proposed volume will draw together existing knowledge in this nascent field Separate sections will address 1 how we can measure affective touch 2 CT structure and physiology 3 CT processing 4 the contribution of CTs to sexual behavior 5 clinical relevance 6 commercial relevance and 7 future research considerations   **The French commercial correspondent, on Hugo's simplified system** French commercial correspondent,1896   Energy Consequences of the Proposed Carbon/energy Tax, Sec (92) 1996, 23 October 1992 Commission of the European Communities.
