epilepsy which helped identify the source of speech executive function and memory in narrow slivers of grey matter achievements that illuminated the relationship between mind and body made possible by Cone's anonymous work behind the scenes. Over time their relationship became fraught with personal and professional hurts and suddenly ended when Cone was found dead in his office at the age of sixty-two. In this compelling dual biography, *Globe and Mail* journalist Eric Andrew Gee weaves together the rich history of The Neuro with that of Penfield and Cone to reveal the untold story of one of the birthplaces of neuroscience. In doing so, he breathes new life into a familiar hero and revives the tragic forgotten story of his partner, writing Dr. William Cone back into the historical record at last.
