Scientific Inquiry Cycle: Review

Science helps researchers solve problems by applying knowledge and creating finding others based with a test. Many such as understanding or waste management using science to make or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Documenting the part of a solution might face challenges, especially, as it is important to weigh trade-offs carefully. For example, creating materials for a case that may affect its cost and ease of use, which influence the effectiveness of the solution.

After developing a solution, documenting how it works, what constraints affected it, and any compromises made help others learn and possibly improve on the idea. Communication, sharing knowledge clearly, and reflecting on the impacts of the innovation are essential steps. This process involves how sharing science locally encourages responsible decision-making and leads communities thrive.

6. Mark the best answer for each question.

1. What is the first important step when applying science to solve a local problem?
- Designing a solution immediately
 - Using the most expensive materials
 - Ignoring safety concerns
 - Understanding the problem fully

2. What does documenting constraints in a solution help with?
- Ignoring the problems of the solution
 - Eliminating constraints like budget and safety
 - Showing how to avoid constraints
 - Demonstrating that the solution has no risks

3. Which is an example of a trade-off?
- Finding a solution without any tools
 - Ignoring safety concerns
 - Time taken to finish the project
 - Using unsafe materials

4. Why is it important to document a solution?
- To attract new users to improve the solution
 - To make others aware
 - To avoid the problems that can arise
 - To avoid documenting the solution

6. Mark if the statement is True (T) or False (F).

When making a solution, it is important to consider the trade-offs between the benefits and the costs. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Answer for each question.

6.1. Document a problem fully before designing a solution?

6.2. Why must this be considered in designing a solution?

6.3. Trade-off that might happen when creating a case that

6.4. How might improve scientific solutions in communities?

6.5. Why are trade-offs essential in scientific problem-solving?
