16. The Coast Guard has sent a rescue helicopter to retrieve passengers off a disabled ship. The ship has called in its position as 1.7 miles from shore. When the helicopter passed over a buoy that is known to be 1.3 miles from shore, the angle formed by the shore, the helicopter, and the disabled ship is  $60^\circ$ . Determine what the altimeter would read to the nearest foot when the helicopter is directly above the buoy. Note that 1 mile is 5280 feet.

**Biological Learning and Control** Reza Shadmehr,Sandro Mussa-Ivaldi,2012-01-27 A novel theoretical framework that describes a possible rationale for the regularity in how we move how we learn and how our brain predicts events In Biological Learning and Control Reza

Shadmehr and Sandro Mussa Ivaldi present a theoretical framework for understanding the regularity of the brain's perceptions its reactions to sensory stimuli and its control of movements They offer an account of perception as the combination of prediction and observation the brain builds internal models that describe what should happen and then combines this prediction with reports from the sensory system to form a belief Considering the brain's control of movements and variations despite biomechanical similarities among old and young healthy and unhealthy and humans and other animals Shadmehr and Mussa Ivaldi review evidence suggesting that motor commands reflect an economic decision made by our brain weighing reward and effort This evidence also suggests that the brain prefers to receive a reward sooner than later devaluing or discounting reward with the passage of time then as the value of the expected reward changes in the brain with the passing of time because of development disease or evolution the shape of our movements will also change The internal models formed by the brain provide the brain with an essential survival skill the ability to predict based on past observations The formal concepts presented by Shadmehr and Mussa Ivaldi offer a way to describe how representations are formed what structure they have and how the theoretical concepts can be tested
