**Thailand** David Smyth, 1998 Since c1970 Thailand's position in the world has changed from potential communist domino to one of the world's most dynamic economies The confrontational politics of the 1970s with the student led revolution of 1973 and the bloody right wing backlash In 1976 were replaced by a new consensus in the following decade A concerted export drive sparked off a tremendous economic boom during the 1980s and early 1990s Tourism also expanded rapidly and is now the single largest foreign exchange earner Economic Success has however been at a cost Each year Bangkok has become more chaotic in the face of increased traffic and an unprecedented building boom and nationally there

has been a widening gap between the haves and the have nots Moreover Thailand is experiencing a potential AIDS time bomb and serious environmental degradation Despite Such pressures and the sudden economic crisis of mid 1997 Thailand has enjoyed an enviable record of stability in recent years
