Taking Food Public Psyche Williams Forson, Carole Counihan, 2013-09-13 The field of food studies has been growing rapidly over the last thirty years and has exploded since the turn of the millennium Scholars from an array of disciplines have trained fresh theoretical and methodological approaches onto new dimensions of the human relationship to food This anthology capitalizes on this particular cultural moment to bring to the fore recent scholarship that focuses on innovative ways people are recasting food in public spaces to challenge hegemonic practices and meanings Organized into five interrelated sections on food production consumption performance Diasporas and activism articles aim to provide new perspectives on the changing meanings and uses of food in the twenty first century Thinking About History Sarah Maza, 2017-09-18 What distinguishes history as a discipline from other fields of study That s the animating question of Sarah Maza s *Thinking About History* a general introduction to the field of history that revels in its eclecticism and highlights the inherent tensions and controversies that shape it Designed for the classroom *Thinking About History* is organized around big questions Whose history do we write and how does that affect what stories get told and how they are told How did we come to view the nation as the inevitable context for history and what happens when we move outside those boundaries What is the relation among popular academic and public history and how should we evaluate sources What is the difference between description and interpretation and how do we balance them Maza provides choice examples in place of definitive answers and the result is a book that will spark classroom discussion and offer students a view of history as a vibrant ever changing field of inquiry that is thoroughly relevant to our daily lives **The Oxford Handbook of Food History** Jeffrey M. Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald s menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social

activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental human concerns
