## **Tax Competition:**

**The Regulation of Tax Competition** Chukwudumogu, Chidozie G.,2021-12-10 This comprehensive book adopts a nuanced yet straightforward approach to analysing the complex phenomenon of international tax competition Using the ongoing international efforts of the Organisation for Economic Co operation and Development OECD and the European Union EU as a basis for its analysis it explores the mixed effects of tax competition and offers an effective approach that takes account of the asymmetrical global context *International Tax Competition* Rajiv Biswas,2002 Many Commonwealth developing countries are potentially affected by the EU and OECD initiatives to regulate international tax competition These articles by experts from Commonwealth countries discuss the concerns of affected nations covering globalisation fiscal sovereignty WTO issues and more *Justice, Equality and Tax Law* Nevia Čičin-Šain,Mario Riedl,2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signalized an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled *Justice Equality and Tax Law* contains not only a selection of the best master s theses of the full time LL M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic **National Tax Policy in Europe** Krister Andersson,Eva Eberhartinger,Lars Oxelheim,2007-09-04 European taxes have long been debated for their potential role as barriers to increased investment and welfare The discussion has often circulated around the size of the tax bases and the magnitude of the tax rate In this book we argue that in the taxation context the European Union EU is at a cross road facing strong forces pushing it into two polar positions One of these is the scenario with all

welfare provided by the national regime and financed by taxes collected entirely by national authorities The other extreme is the situation where all welfare is fered at an EU level financed entirely by taxes collected at that level The two forces pressing the tax situation into one of these two poles are spelt tax compe tion and welfare arbitrage The research question addressed in this book covers the existence of a potential steady state in between these to poles Our basic pothesis is that their might be such a steady state due to the immobility of some tax bases and where the taxation of these bases have no externalities affecting vestment We argue that the very complex tax structures of Europe and the tax certainty facing investors in Europe need to be addressed in a comprehensive way *Policy Responses to Tax Competition* David R.

Agrawal,James M. Poterba,Owen M. Zidar,2025-10-29 A critical examination of the effects of tax competition Policy Responses to Tax Competition provides an in depth exploration of how jurisdictions design taxes on mobile economic factors Tax competition between jurisdictions that seek to attract businesses and residents presents both opportunities and challenges It can foster government efficiency and provide a counterweight to lobbying for increased spending but it can also result in inefficiently low tax rates and revenue shortfalls as jurisdictions vie for tax bases This volume examines the economic drivers and consequences of tax competition and presents empirical evidence on its effects Divided into three parts the book first reviews existing research on the determinants and consequences of tax competition and related policy initiatives such as development incentives The second section focuses on specific policies such as the Kansas Missouri noncompete pact and international measures like the OECD s Base Erosion and Profit Shifting initiative that are designed to limit tax competition It also considers the economic responses to these policies the distributional impact of competition reducing policies and potential strategic reactions of other governments The final section presents case studies of the effects of various policies including inter municipal cooperation in France and corporate tax equalization in Switzerland Altogether this volume provides new insights into the nature of inter jurisdictional tax competition and the range of potential responses available to jurisdictions at various levels in federal systems *International and Comparative Taxation:Essays in Honour of Klaus Vogel* Klaus Vogel,Moris Lehner,Arndt Raupach,Michael Rodi,2002-09-03 Compilation of the 16 English language contributions of Staaten und Steuern States and Taxes the original festschrift to honour Klaus Vogel

**Wars** Brigitte Alepin, Blanca Moreno-Dodson, Louise Otis, 2016-04-24 Over the past few decades the concentration of wealth and property in the hands of a few has been facilitated by tax evasion tax avoidance and above all by tax competition Fortunately a determined move toward international cooperation among tax authorities is gathering its forces to do battle This invaluable book shows how the globalization of trade the digitization of the economy tax competition between sovereign states the erosion of the tax base and the transfer of profits have all revealed the weaknesses of a traditional tax system that has reached its limits and how numerous states and groups of states have joined efforts in creating a new international tax system designed to restore fairness and stability in the levying of taxes worldwide Stemming from a 2016 conference initiated by the Canadian non profit organization TaxCOOP convened by the World Bank and bringing together well known taxation experts from prominent international organizations the book presents outstanding contributions highlighting the impacts of tax competition and viable solutions Among the issues and topics covered are the following electronic commerce and electronic money transfer pricing derivatives and hedge funds protecting tax whistle blowers offshore tax investigations possibility of an international tax court impact of tax competition on developing countries carbon pricing tobacco taxation and effective taxation of the ultra wealthy and their financial capital The chapters include details of country experiences and results in some cases analyzed by key protagonists themselves Collectively the contributions take a giant step toward reinforcing the power of sovereign states in sectors such as the environment education and health As an authoritative guide to increasing the level of transparency and accountability of private and public economic actors and restoring citizens trust in the fairness of our global governance systems this peerless volume will be warmly welcomed by tax lawyers taxation authorities and interested academics worldwide *The Encyclopedia of Taxation & Tax Policy* Joseph J. governments to prevent tax competition are fallacious It also outlines the threats to tax competition from the EU and OECD and proposes ways in which the UK government should respond to those threats

### **Tax Competition and Tax**

**Coordination when Countries Differ in Size** S. M. Ravi Kanbur, Michael Keen, 1991 Differences in country size exacerbate the inefficiency of tax competition harming both a smaller country and a larger one But different forms of tax cooperation can have very different effects The smaller country would lose from harmonizing tax rates but both would gain from imposing a minimum tax The optimal joint response to free cross border trade however may be to do absolutely nothing

### **Tax Notes**

**International**, 2003    **Tax Competition and EU Law**, 2002    **Global Tax Revolution** Chris Edwards, Daniel J.

Mitchell, 2008-09-23 This book explores one of the most dynamic and exciting aspects of globalization international tax competition With rising mobility and soaring capital flows individuals and businesses are gaining freedom to work and invest in nations with lower tax rates That freedom is pressuring governments to cut taxes on income investment and wealth In Global Tax Revolution Chris Edwards and Daniel Mitchell chronicle tax reforms around the world in recent decades They describe the dramatic business tax cuts of Ireland the flight of successful people from high tax France and the introduction of simple flat taxes in more than two dozen nations Like other aspects of globalization tax competition is generating intense political opposition Numerous governments and international organizations are fighting to restrict tax cuts Edwards and Mitchell challenge those efforts arguing that tax competition is helping to advance prosperity expand human rights and rein in bloated governments The authors argue that the US economy can be revitalized by embracing competition and overhauling the federal tax code They discuss how current tax rules suppress wages and investment and describe the tax changes needed for workers and businesses to succeed in the fast paced global economy Rather than idly complaining about jobs and capital moving offshore this book argues that policymakers need to embrace major tax reforms to ensure rising standards of living for Americans in the years ahead

*International Tax Policy* Tsilly Dagan, 2017-12-14 Bringing a unique voice to international taxation this book argues against the conventional support of multilateral co operation in favour of structured competition as a way to promote both justice and efficiency in international tax policy Tsilly Dagan analyzes international taxation as a decentralized market where governments have increasingly become strategic actors While many of the challenges of the current international tax regime derive from this decentralized competitive structure Dagan argues that curtailing competition through centralization is not necessarily the answer Conversely competition if properly calibrated and notwithstanding its dubious reputation is conducive rather than detrimental to both efficiency and global justice

*International Tax Policy* begins with the basic normative goals of income taxation explaining how competition transforms them and analyzing the strategic game states play on the bilateral and multilateral level It then considers the costs and benefits of co operation and competition in terms of efficiency and justice

OECD, 1998-05-19 Tax competition in the form of harmful tax practices can distort trade and investment patterns erode

national tax bases and shift part of the tax burden onto less mobile tax bases The Report emphasises that governments must intensify their cooperative actions to curb harmful tax practices *Tax Competition in Europe* Wolfgang Schön (Prof.),2003 Comprising the proceedings of the 2002 conference of the European Association of Tax Law Professors EATLP providing an in depth analysis of tax competition in Europe Focusing on the political economic and legal implications of international tax competition in their respective countries academic tax lawyers from 16 European countries present their national reports The main features of these national reports are analysed and the general aspects as well as the advantages of tax competition are discussed Finally tax competition is examined from an EU perspective and the harmonization effects of state aid rules in the field of tax law are discussed **Globalization, Tax Competition and the Future of Tax Systems** Mr.Vito

Tanzi,1996-12-01 This paper discusses the implications for tax systems of globalization of capital markets and of economies It shows the extent to which particular taxes are affected by the globalization process It speculates on future developments in this area and on tax competition *Unilateral Measures Against Offshore Tax Evasion* Markus Meinzer,2008-10 Diploma Thesis from the year 2008 in the subject Politics Region Middle and South America grade 1 3 Free University of Berlin language English abstract The present thesis seeks to contribute to substantial answers to this question Its subject is a set of regulatory measures taken by the Argentinean Corporate Supervisory Board Inspección General de Justicia IGJ between 2003 and 2005 One of their alleged aims is to counteract offshore tax evasion through a ban of the aforementioned shell companies an approach which is deemed to be unique and novel worldwide The venture of the IGJ rests on the assumption that the bona fide treatment of the latter s legal person is crucial for cross border tax evasion Designed as an explorative case study the thesis central interrogative is about the normative judicial scope and the factual impact of IGJ s policy on offshore tax evasion Much of the data underlying the answers given henceforth has been collected through a two months field research in Buenos Aires The structure of the thesis is as follows The second chapter opens with a brief section of definitions of key terms used thereafter 2 1 Section two 2 2 seeks to clarify the practical relevance of the subject and to establish and engross its links to two theoretical debates Thereby the central question and two related hypothesis will be carved out 2 3 In the following section 2 4 the subject is circumscribed Epistemological and broad methodological issues are addressed in section 2 5 sources and formal issues are presented in 2 6 The field research and interview methodology are subject of section 2 7 The third chapter is dealing mostly in a descriptive way with the legal context of the IGJ norms 3 1 focuses on institutional and general administrative issues in relation to their implementation 3 2 presents the regulations in question chronologically 3 3 and eventually summarizes the mayor issues relevant for the subsequent analy
