Tax Reform And The Cost Of Capital:

Tax Reform and the Cost of Capital Dale Weldeau Jorgenson, Kun-Young Yun, 1991 The cost of capital was introduced almost thirty years ago and quickly became an indispensable tool for modelling the impact of tax policy on investment behavior. Within the past decade the cost of capital has assumed a central role in tax reform debates through the closely related concept of the marginal effective tax rate. This book provides a comprehensive treatment of the cost of capital approach to tax policy analysis. Keeping the analytical level of this work has been kept to a minimum the authors introduce complexities in a step by step fashion leading up to a representation of tax systems for capital income that is suitable for tax policy analysis. The success of the cost of capital approach is due in large part to its ability to assimilate a virtually unlimited amount of descriptive detail on alternative tax policies. To provide guidance to students and tax policy professionals this book contains a full implementation of the approach for the United States including an analysis of the alternative proposals that culminated in the highly influential Tax Reform Act of 1986 in the United States. It also describes opportunities for further research and gives a complete and up to date bibliography to the rapidly expanding literature. This is the first in a series of Lectures in Monetary and Fiscal Policy at Uppsala University in honor of Erik Lindahl

Tax Reform and the Cost of Capital Dale W. Jorgenson, Ralph Landau, 2010-12-01 The tax reform movement that swept the U.S. Great Britain and most other industrialized nations during the last decade has focused attention on international comparisons of the cost of capital. More recently international comparability has become a critical issue of tax harmonization. This is a vital concern in the European Community as well as between Canada and the United States. This volume provides international comparisons of the cost of different types of capital for nine major industrialized countries: Australia, Canada, France, Germany, Italy, Japan, Sweden, the United Kingdom and the United States for the period 1980-1990. In the early 1980s the introduction of tax incentives for saving and investment gradually shifted the tax base from income toward consumption. By 1990 most of these special tax provisions had been reduced or repealed in order to lower tax rates and equalize the tax treatment of different forms of capital income. Income was firmly reestablished as the most appropriate basis for taxation. Separate chapters for each of the nine countries written by leading experts in public economics provide detailed accounts of tax policy changes over the decade. Each chapter contains a quantitative description of these tax policies and summarizes this information in the form of effective tax rates. The book thus serves as an indispensable reference for comparing capital income taxation in industrialized countries during a period of rapid policy change

Tax Reform and the Cost of Capital Dale Weldeau Jorgenson, Kun-Young Yun, 1991 The first of a set of lectures inaugurated by the University of Uppsala and given every two years in honour of the Swedish economist Erik Lindahl. The lectures in this volume survey the new theoretical links between monetary theory and public finance
