Taxing Capital Income Henry J. Aaron, Leonard E. Burman, C. Eugene Steuerle, 2007-07-02 The question of whether to tax income from wealth has sparked debate since our country's inception Does taxing capital income ensure the progressivity of our system or merely discourage saving Would switching our tax code to one that taxes only consumption be more efficient or only burden middle and low income people And if we were to radically reform the way America taxes its citizens how could we ensure that vital revenue would not be lost Some analysts would even argue that under our present byzantine tax system we don't really tax capital income at all In this volume eminent economists analyze the problems associated with taxing capital income and propose policy solutions which are then

challenged by their peers in informed commentary It may not settle the debate but policymakers scholars and the public will find a wealth of information and ideas to consider
