## **Teacher Burnout:**

Understanding and Preventing Teacher Burnout Roland Vandenberghe, A. Michael Huberman, 1999-05-28 International specialists review research in the field of career burnout in this 2009 volume Teacher Burnout in the Public Schools Anthony Gary Dworkin, 1987-01-01 This unique study is the first large scale sociological analysis of teacher burnout linking it with alienation commitment and turnover in the educational profession In the process of doing so Anthony Gary Dworkin uncovers some startling trends that challenge previous assumptions held by public school administrators Urban public school districts spend up to several million dollars annually on programs intended to rekindle enthusiasm among their teachers hoping thereby to reduce the turnover rates They also assume that enthusiastic teachers will heighten student achievement Yet data presented in *Teacher Burnout in the Public Schools* challenge these suppositions Dworkin's research shows teacher entrapment rather than teacher turnover as the greater problem in education today Teachers are now more likely to spend their entire working lifetime disliking their careers and sometimes their students rather than quitting their jobs and Dworkin proposes that principals more than any other school personnel can do much to break the functional linkage between school related stress and teacher burnout The author's findings also indicate that burned out teachers pose a minimal threat to the achievement of most children but that they do have an adverse impact on brighter students *Teacher Burnout in the Public Schools* includes an inventory of supported propositions and three levels of policy recommendations These important policy recommendations suggest substantial organizational changes in the nature of the training of public school teachers in the college educational curriculum in the teacher employment and deployment practices of school districts as well as in the administrative style of school principals *Teacher Burnout from a Complex Systems Perspective* Carol Griffiths, 2025-04-28 This edited book investigates the factors contributing to teacher burnout and its potential consequences Topics include the relationship of burnout to cultural identity modality and job satisfaction and chapters discuss various settings such as the English as a Medium of Instruction EMI classroom secondary and primary schools The book aims to provide possible solutions and ways forward for tackling the issue of burnout both at a personal and systemic level It will be of interest to students and scholars in the fields of teacher education wellbeing school and schooling as well as practising teachers and school leadership *Promoting Mental Health at Work: New Insights and Practical Implications* Elisabeth Schramm, Claas Lahmann, Christine Allwang, Kai G.
