*Changes in Secondary School Mathematics in Australia, 1964-1978* Malcolm J. Rosier,1980 The purpose of the monograph is to provide empirical data about mathematics achievement of secondary students in Australia in 1964 and 1978 The data were drawn from Australia wide surveys conducted at two levels 13 year old students and Year 12 mathematics students The tests used for surveys were originally prepared by the International Association for the Evaluation of Educational Achievement IEA for cross national studies of achievement in mathematics In addition to measuring mathematics performance the studies analysed the mathematics curriculum in order to demonstrate how the changes in performance were linked to the changes in curriculum and in other aspects of the educational system There was a slight decline in mathematics performance from 1964 to 1978 at the 13 year old level At the Year 12 level the performance increased in spite of increases in student participation rates at this level      Documents of the ...
