*Greenpeace* Robert Keziere, 1972      *The Greenpeace Green Living Guide* Greenpeace Foundation, 2007      *Greenpeace*, 1990      **Greenpeace Update**, 2001      *Greenpeace Examiner*, 1986      *Smelter Smoke in North America* John D.

Wirth, 2000 Air pollution challenges nations sharing common borders to balance economic needs with protecting citizens and the environment across jurisdictions. By examining landmark cases on the two borders John Wirth shows how environmental diplomacy, citizen action at the grassroots level and the role of science, industry and the law converged bringing Canada, the United States and Mexico to the threshold of today's continental approaches to pollutant pathways. Wirth first examines the famous Trail smelter conflict of 1927-1941. This precedent setting case which pitted U.S. farmers against the Canadian smelter resulted in the doctrine that in cases of transborder damage the polluter must pay. Although the farmers were modestly compensated and the British Columbia based smelter cooperated to control pollution, Wirth reveals the real significance of the decision: U.S. industries shared with the Canadians a common interest to resolve the case in a manner that would allow them to continue to pollute freely across international borders with minimal regulation. Wirth then turns to the Gray Triangle confrontations of the 1980s in which the new instruments of the Clean Air Act and cooperative policies developed by the Mexican and U.S. governments established an entirely new climate for citizen action resulting in the closing of an American smelter in Arizona and the imposition of stricter standards on two Mexican smelters in Sonora. Although the Trail precedent favored industry, the Gray Triangle resolution signaled that the needs of industry and the public interest were now in better balance. Drawing on extensive interviews and previously untapped archives, *Smelter Smoke in North America* provides new analysis of the development of a North American institutional response to continental air pollution. It chronicles how industry developed a continental perspective in a shared regional space, the mineralized West, and how successful efforts of governments and citizens to protect the environment evolved.

**Greenpeace III** David Fraser McTaggart, Robert Hunter, 1979      *A Green and Permanent Land* Randal S. Beeman, James A. Pritchard, 2001 Once patronized primarily by the counterculture and the health food establishment, the organic food industry today is a multi billion dollar business driven by ever growing consumer demand for safe food and greater public awareness of ecological issues. Assumed by many to be a recent phenomenon, that industry owes much to agricultural innovations that go back to the Dust Bowl era. This book explores the roots and branches of alternative agricultural ideas in twentieth century America showing how ecological thought has challenged and changed agricultural theory, practice and policy from the 1930s to the present. It introduces us to the people and institutions who forged alternatives to industrialized agriculture through a deep concern for the enduring fertility of the soil, a passionate commitment to human health and a strong advocacy of economic justice for farmers. Randal Beeman and James Pritchard show that agricultural issues were central to the rise of the environmental movement in the United States. As

family farms failed during the Depression a new kind of agriculture was championed based on the holistic approach taught by the emerging science of ecology Ecology influenced the permanent agriculture movement that advocated such radical concepts as long term land use planning comprehensive soil conservation and organic farming Then in the 1970s sustainable agriculture combined many of these ideas with new concerns about misguided technology and an over consumptive culture to preach a more sensible approach to farming In chronicling the overlooked history of alternative agriculture *A Green and Permanent Land* records the significant contributions of individuals like Rex Tugwell Hugh Bennett Louis Bromfield Edward Faulkner Russell and Kate Lord Scott and Helen Nearing Robert Rodale Wes Jackson and groups like Friends of the Land and the Practical Farmers of Iowa And by demonstrating how agriculture also remains central to the public interest especially in the face of climatic crises genetically altered crops and questionable uses of pesticides this book puts these issues in historical perspective and offers readers considerable food for thought Fundamental Perspectives on International Law William R.
