Simply Explained

The Other Theory Of Physics

Jean de Climont

The Other Theory Of Physics:

The Other Theory of Physics James Carter, **Physics on the Fringe** Margaret Wertheim, 2011-11-01 For the past fifteen years acclaimed science writer Margaret Wertheim has been collecting the works of outsider physicists many without formal training and all convinced that they have found true alternative theories of the universe Jim Carter the Einstein of outsiders has developed his own complete theory of matter and energy and gravity that he demonstrates with experiments in his backyard with garbage cans and a disco fog machine he makes smoke rings to test his ideas about atoms Captivated by the imaginative power of his theories and his resolutely DIY attitude Wertheim has been following Carter's progress for the past decade Centuries ago natural philosophers puzzled out the laws of nature using the tools of observation and experimentation Today theoretical physics has become mathematically inscrutable accessible only to an elite few In rejecting this abstraction outsider theorists insist that nature speaks a language we can all understand Through a profoundly human profile of Jim Carter Wertheim's exploration of the bizarre world of fringe physics challenges our conception of what science is how it works and who it is for New Science Theory Vincent Wilmot, 2011-02 New Science Theory by Vincent Wilmot is basically the New Science Theory com website as on 6 April 2022 for any changes since then visit the site where its Sitemap notes any updates Especially good for those interested in physics and physics history it concentrates chiefly on the four great physicists Albert Einstein Isaac Newton Rene Descartes and William Gilbert Also here are fine sections covering Galileo Kepler Tesla History of Science Philosophy of Science Information Physics Gravity Light Standard Model String Theory Probability Science and General Image Theory **The Worldwide List of Alternative Theories and Critics** Jean de Climont, 2020-11-01 This Worldwide List of Alternative Theories and Critics only available in english language includes scientists involved in scientific fields The 2023 issue of this directory includes the scientists found in the Internet The scientists of the directory are only those involved in physics natural philosophy The list includes 9700 names of scientists doctors or diploma engineers for more than 70% Their position is shortly presented together with their proposed alternative theory when applicable There are nearly 3500 authors of such theories all amazingly very different from one another The main categories of theories are presented in an other book of Jean de Climont **THE ALTERNATIVE THEORIES** The Death of Science Andrew Holster, 2016-07-26 Modern science is in unprecedented crisis It is a crisis at many levels continuous with larger crises of modern society It is a crisis for the vocation of the scientist working within the modern institutionalised structures of science It is a crisis for our capacity to use science benevolently to help solve larger material organisational and ultimately political problems of the modern era And it is a crisis for philosophy for the role of natural science to help inform our world view The Death of Science is an account of deeper causes of this malaise It starts by taking up the reins of Lopez Corredoira's 2013 The Twilight of the Scientific Age a recent critique that concludes with modern science on its death bed It dissects key themes in detail illustrated in the same frank style drawing on personal examples It starts with deep issues in

the philosophy of science recounting failed modern concepts of scientific progress method and truth going on to failures of peer review and gate keeping as quality control systems the domination of propaganda and marketing channels as the critical tools for professional success and the major outcome for creative scientists themselves the destruction of scientific creativity and exclusion of heterodox thinkers in this degraded environment It connects the behavioural symptoms with a psycho social analysis of the bureaucratic mode of organisation under which science like all other modern vocations is now subsumed The account supports Lopez Corredoira's appraisal which sees a modern science industry driven by greed and ambition repressing imagination and freedom destructive of novelty and diversity of ideas controlled by bureaucratic academic power hierarchies While science is irrevocably corrupted by its modern mass institutionalisation the true spirit of science can only be sustained by individuals with a real vocation as scientists or natural philosophers who seek understanding and meaning and wisdom rather than technocratic specialisation and careers But it is increasingly impossible for scientists to withstand forces of professional conformity and maintain their personal sense of value A number of current controversies in some core sciences are also discussed and it is argued that the greatest revelations of real science are yet to come While Establishment Science has locked itself into dogmatic paradigms the failures of present theories show that we are really on the cusp of major revolutions spanning sciences of physics and cosmology information and intelligence biology and evolution and mind and consciousness If these are realised they will profoundly change our understanding of the nature of the world and ourselves But any such revolutions challenge a Science Establishment locked into the self interest of its power brokers and are unlikely to occur except through independent scientists working outside the institutional system The book concludes with a brief discussion of the place of independent scientists

New Science Theory and On The Magnet Vincent Wilmot, William Gilbert, 2015-07-22 The first book is basically the New Science Theory com site as on 1 January 2018 for changes since then visit the website with its Sitemap noting updates It is especially good for those interested in physics theory concentrating chiefly on the four great physicists William Gilbert Rene Descartes Isaac Newton and Albert Einstein and also having fine sections on Galileo Kepler History of Science Gravity Light String Theory Standard Model Physics Probability Science Philosophy of Science and General Image Theory Science The second book is a new improved English translation of William Gilbert's banned Latin 1600 *De Magnete* or *On The Magnet* This is rather easier to read than its two earlier translations and significantly helps to clarify Gilbert's attraction physics which Newton put as one of the two mathematized physics options and which he is believed to have privately favoured It is basically a novel signal response or remote control physics that may still have relevance

The Other Theory of Physics James Carter, 1994-07-01 GRAVITATION DOES NOT EXIST The constant upward acceleration that we call gravity is not an attraction or curvature of space but is actually a real upward motion of the earth's surface caused by the constant expansion of all the atoms in the universe An object that appears to fall towards the earth actually remains motionless while the earth's surface accelerates upward until they collide While the

rational mind may immediately reject the idea of constantly expanding matter as an impossibility careful analysis will show this to be a purely psychological reaction that cannot be supported by either logic or experimental fact since there is no natural law that prevents this counter intuitive idea from being true In actual fact this bold new explanation of reality provides elegant solutions to many of the most perplexing paradoxical mysteries of physics cosmology such as the Big Bang quasars dark matter cosmological red shifts atomic structure missing antimatter This lavishly illustrated book describes many well known scientific experiments then details the way the results are interpreted by competing theories If you think that you already understand the basic laws of physics then reading THE OTHER THEORY OF PHYSICS is a must To order contact Absolute Motion 206 525 9427
