Films, 1964-1979 Bonnie Noonan,2015-06-15 The 1950s era of science fiction film effectively ended when space flight became a reality with the first manned orbit of Earth in 1962 As the genre s wildly speculative depictions of science and technology gave way to more reality based representations relations between male and female characters reflected the changing political and social climates of the era Drawing on critical analyses film reviews and cultural commentaries this book examines the development of science fiction film and its representations of gender from the groundbreaking films of 1968 including 2001 A Space Odyssey Barbarella and Planet of the Apes through its often overlooked Middle Period which includes such films as Colossus The Forbin Project 1970 The Stepford Wives 1975 and A Boy and His Dog 1975 The author examines intersections of gender and race in The Omega Man 1971 and Frogs 1972 gender and dystopia in Soylent Green 1973 and Logan s Run 1976 and gender and computers in Demon Seed 1977 The big budget films of the late 1970s Close Encounters of the Third Kind Alien and Star Wars are also discussed *Irwin Allen Television Productions, 1964-1970* Jon Abbott,2015-06-14 Before establishing himself as the master of disaster with the 1970s films The Poseidon Adventure and The Towering Inferno Irwin Allen created four of television s most exciting and enduring science fiction series Voyage to the Bottom of the Sea Lost in Space The Time Tunnel and Land of the Giants These 1960s series were full of Allen s favorite tricks techniques and characteristic touches and influenced other productions from the original Star Trek forward Every science fiction show owes something to Allen yet none has equaled his series pace excitement or originality This detailed examination and documentation of the premise and origin of the four shows offers an objective evaluation of every episode and demonstrates that when Irwin Allen s television episodes were good they were great and when they were bad they were still terrific fun **Star Trek** Robert Greenberger,2012-11-08 This is the first book to combine an authoritative history of

the Star Trek franchise including all six television series and eleven feature films with anecdotes about the show from those who helped shape it from the outside in the fans Star Trek expert Robert Greenberger covers everything from show creator Gene Roddenberry's initial plans for a series combining science fiction and Western elements the premiere of the original series in 1966 its cancellation the franchise's return in an animated series and its subsequent history on television and film up to expectations for the 2013 J J Abrams film Along the way Greenberger analyzes Star Trek's unique cultural impact and tremendous cult following including the famous and first ever save the show mail campaign But this isn't a sugarcoated history this book chronicles the missteps as well as the achievements of Roddenberry and others behind the franchise Approximately two dozen sidebars provide personal experiences of dedicated Trekkies who influenced or became a part of the franchise Star Trek fandom is unparalleled in the effects it has had on the franchise itself The book is illustrated with a large collection of photographs of memorabilia many of which have never been seen before in print
