Mathematical Reviews ,2001 *Spatial Aspects of Environmental Policy* Wayne Gray,2019-01-22 There has been a recent explosion of research incorporating a spatial dimension in environmental and natural resource economics where the spatial aspects of human behaviour or the natural environment make a crucial difference in the analysis and policy response to the problem Much of this research has been driven by the growing availability of spatially explicit social science data and the development of tools and methodological advances to use these data Collected in this volume are 24 key articles considering the reasons for spatial variation in policies due to either efficiency or equity considerations and the consequences of that spatial variation for both environmental and economic outcomes These articles demonstrate that the failure to address spatial issues in the analysis can create two problems 1 the analysis provides a poor basis for predicting actual behaviour that is specifically based upon spatial considerations and 2 the analysis fails to provide a basis for designing spatially targeted policies that could lead to more efficient outcomes Logic for Programming, Artificial Intelligence, and Reasoning Iliano Cervesato,Helmut Veith,Andrei Voronkov,2008-11-13 This book constitutes the refereed proceedings of the 15th International Conference on Logic for Programming Artificial Intelligence and Reasoning LPAR 2008 which took place in Doha Qatar during November 22 27 2008 The 45 revised full papers presented together with 3 invited talks were carefully revised and selected from 153 submissions The papers address all current issues in automated reasoning computational logic programming languages and their applications and are organized in topical sections on automata linear arithmetic verification knowledge representation proof theory quantified constraints as well as modal and temporal logics
