Electronic String Art Stephen Erfle, 2024-02-20 String art is a well known and popular activity that uses string a board and nails to produce artistic images although there are variations that use different modalities This activity is beloved because simple counting rules are used to create beautiful images that can both adorn walls and excite young minds The downside of this highly tactile activity is that it is quite time consuming and rigid By contrast electronic string art offers much more flexibility to set up or change nail locations and counting rules and the images created from those changes change instantaneously Electronic String Art Rhythmic Mathematics invites readers to use the author's digital resources available on the ESA website to play with the parameters inherent in string art models while offering concise accessible explanations of the underlying mathematical principles regarding how the images were created and how they change Readers will have the opportunity to create visually beautiful works of art while learning concepts from geometry number theory and modular arithmetic from approximately 200 short interdependent sections Features Readers are able to drill down on images in order to understand why they work using short 1 to 2 page stand alone sections Sections are lessons that were created so that they could be digested in a single sitting These sections are stand alone in the sense that they need not be read sequentially but can be referred to based on images that the reader finds interesting An open ended inherently flexible teaching resource for elementary middle and high school level mathematics The most mathematically challenging sections or portions of a section are designated MA and may not be accessible to elementary and middle school readers Will be appreciated by anyone interested in recreational mathematics or mathematical artworks even if the users are not interested in the underlying mathematics Includes exercises solutions and many online digital resources These QR codes take you to these digital resources One takes you directly to the web version of the string art model used as a starting point for teaching the parameters of the model in Section 25.5 The other takes you to the ESA web page with additional links to a variety of resources

Critical Data Storytelling in the Composition Classroom Angela Laflen, 2025-08-15 Critical Data Storytelling in the Composition Classroom provides a timely and essential framework for integrating data literacy into multimodal composition pedagogy Angela Laflen demonstrates that in an era dominated by big data and AI the need to understand how to work with data is no longer limited to scientists and mathematicians Instead data literacy has become a crucial skill for participating in democratic society At the heart of Laflen's approach is critical data storytelling a practice that equips students with the skills to understand interpret and ethically communicate with and about data through various multimodal formats By teaching students to make informed decisions as

data storytellers Laflen addresses the ethical implications of working with data while offering practical strategies for reading and analyzing data stories This approach empowers both students and teachers to engage critically with data as a tool for learning and communication It also highlights how multimodal composition has yet to fully account for the central role of data in shaping contemporary communication and argumentation By focusing on the ethical and rhetorical dimensions of data storytelling Critical Data Storytelling in the Composition Classroom presents a pedagogical approach that prepares students for the challenges of working with data in a rapidly evolving digital landscape This flexible adaptable model for teaching critical data literacy is of great interest to writing instructors scholars in rhetoric and composition and educators who seek to prepare students for the demands of a data driven world **Resources in Women's Educational Equity ,**

City document Worcester (Mass.),1877 Artist-Teacher Practice and the Expectation of an Aesthetic Life Carol Wild,2022-07-08 This book explores why and how the personal creative practice of arts teachers in school matters It responds to ethnographic research that considers specific works of art created by teachers within the context of their classrooms Through a classroom based ethnographic investigation the book proposes that the potential impact of artist teacher practice in the classroom can only be understood in relation to the flows of power and policy that concurrently shape the classroom It shows how artist teacher practice functions as a creative practice of freedom tending to the present and future aesthetic life of the classroom countering the effects of neoliberal schooling and austerity politics The book questions what the artist teacher can produce within that context Through the unique focus on artist teacher practice the book explores the changing nature of the classroom and the social and political dimensions of the school It will be key reading for researchers and postgraduate students of arts education critical pedagogy teacher identity and aesthetics It will also be of interest to art and design educators Connecticut School Document ...
