Division of Substance Abuse,1986 **Morality Politics in American Cities** Elaine B. Sharp,Yvette M. Alex-Assensoh,2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study Morality Politics in American Cities is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative Morality Politics in American Cities demonstrates that such issues same sex marriage for example are multidimensional and often difficult to

feelings and behaviours believed to support a drug lifestyle Although the approach described in this book utilizes a number of cognitive behavioural techniques the approach is unique in the sense that it also deals with the fear of change that frequently interferes with a client's ability to benefit from therapy It also considers change strategies used by people who have escaped from a drug lifestyle without any type of treatment or formal intervention Momentarily arresting the lifestyle is the first step of intervention This is followed by skill development in which the conditions choices and cognitions associated with a drug lifestyle are targeted for intervention and change In the final phase of this approach the client is engaged in the resocialization process whereby he or she is encouraged to develop ways of thinking and behaving that are incompatible with continued misuse of psychoactive substances The end result is a concise yet comprehensive examination of ways clinicians might facilitate change in persons previously committed to a drug lifestyle
