Syntax Phonology Interface In Focus And Topic Constructions In Italian:

The Syntax-Phonology Interface in Focus and Topic Constructions in Italian M. Frascarelli, 2013-03-09 this work represents a key case study in the study of the prosody and syntax interactions Pilar Prieto *Lingua* 115 2005 A Derivational Syntax for Information Structure Luis López, 2014-05-14 In this volume Luis Lo ez sheds new light on information structure He presents a model of syntax information structure interaction and argues that this interaction takes place at the phase level with a privileged role for the edge of the phase **Information Structure and its Interfaces** Lunella Mereu, 2009-02-26 The volume presents recent results in the field of Information Structure based on research on Italian and Italian dialects and on further studies on several typologically different languages The central idea is that Information Structure is not an exclusive matter of syntax but an interface issue which involves the interplay of at least the phonological morpho syntactic and semantic pragmatic levels of analysis In addition the volume is based on the study of actual language use and it adopts a cross linguistic point of view **Information Structuring of Spoken Language from a Cross-linguistic Perspective** M. M. Jocelyne Fernandez-Vest, Robert D. Van Valin, 2015-12-14 Information structure and the organization of oral texts have been rarely studied crosslinguistically This book contains studies of the grammatical organization of information in languages from different areas e g Amazonian Finno Ugric South Asian from a variety of theoretical angles It will be a valuable resource for researchers investigating the interaction of morphosyntax and discourse in familiar and less familiar languages *Beyond Functional Sequence* Ur Shlonsky, 2015 Cartography is a research program within syntactic theory that studies the syntactic structures of a particular language in order to better understand the semantic issues at play in that language The approach arranges a language s morpho syntactic features in a rigid universal hierarchy and its research agenda is to describe this hierarchy that is to draw maps of syntactic configurations Current work in cartography is both empirical extending the approach to new languages and new structures and theoretical The 16 articles in this collection will advance both dimensions They arise from presentations made at the Syntactic Cartography Where do we go from here colloquium held at the University of Geneva in June of 2012 and address three questions at the core of research in syntactic cartography 1 Where do the contents of functional structure come from 2 What explains the particular order or hierarchy in which they appear 3 What are the computational restrictions on the activation of functional categories Grouped thematically into four sections the articles address these questions through comparative studies across various languages such as Italian Old Italian Hungarian English Jamaican Creole Japanese and Chinese among others **L1 Acquisition and L2 Learning** Larisa Avram, Anca Sevcenco, Veronica Tomescu, 2021-11-15 This volume includes fourteen papers on the acquisition of Romance languages eleven of which were presented at the Romance Turn 9 held in Bucharest in September 2018 The studies offer new insights into central issues in the literature such as syntactic complexity in both typical and impaired language settings intervention effects the acquisition of phenomena which involve

both syntactic parameters and an external interface as well as cross linguistic interference effects They present novel longitudinal and experimental data on the first language acquisition and second language learning of French Italian European and Brazilian Portuguese Romanian and Spanish A unique feature of this volume is the focus on the interaction of language specific properties and of factors which are not specific to the faculty of language in the narrow sense such as data processing the nature of the input discourse structure computational load sociolinguistic properties and the development of Theory of Mind

and an interface model Two interface rules are proposed to account for the interpretation of word order and the conjoint and disjoint verb forms in Makhuwa Enahara
