*Synthetic Paper from Fibers and Films* Marcia Halpern Gutcho, 1975      *Caring for Plastics in Collections* Mary Coughlin, 2025-04-29 *Caring for Plastics in Collections* presents basic knowledge of plastics in an accessible way and empowers readers to determine the best approach for care taking into account the resources at their institution and the needs of their specific collection Drawing on the author's 20 years of experience working as an Objects Conservator the book defines what a plastic is which plastics are most worrisome in collections and why and how you can identify plastics monitor them and mitigate issues Clarifying that there are guidelines that all plastics will benefit from Coughlin outlines a gradual consistent approach to care that is supplemented by 25 case studies from 10 institutions Knowing that collection teams are too frequently understaffed and funds are often limited the book approaches the care of plastics from both preventive conservation and collection management with a focus on low cost accessible options for monitoring potential degradation products the use of readily available materials and resources tips for designing condition surveys and using existing database content to flag plastics that may pose a collection risk In this way collection stewards such as collection managers registrars curators archivists and anyone tasked with caring for collections containing plastics will be poised to make more informed decisions about storage display and loans *Caring for Plastics in Collections* is an essential resource for professionals working in a range of institutions around the globe including galleries libraries archives historic houses and museums      *Handbook of Colorants Chemistry* Ingo Klöckl, 2023-04-27 Volume 2 of the *Handbook of Colorant Chemistry* focuses on paints painting and drawing systems used by the painter and craftsman It describes in detail structure of oil watercolor acrylic and ceramic paints inks toners and other drawing systems From presenting molecular compositions of common paints and inks to a historical look at color chemistry the author offers an in depth look at the world of color The complementary Volume 1 *Dyes and Pigments Fundamentals* ISBN 978 3 11 077699 7 focuses on paints painting and drawing systems used by the painter and craftsman The book is supplemented by a comprehensive bibliography with references to standard works monographs and original papers The reader is provided with a unique overview of the field of color chemistry      **Pulp and Paper Manufacture** Marshall Sittig, 1977      *Bulk Chemicals from Petroleum* B.K. The second edition of this textbook is identical with its fourth German edition and it thus has the same goals: precise definition of basic phenomena, a broad survey of the whole field, integrated representation of chemistry, physics and technology and a balanced treatment of facts and comprehension. The book thus intends to bridge the gap between the often oversimplified introductory textbooks and the highly specialized texts and monographs that cover only parts of macromolecular science. The text intends to survey the whole field of macromolecular science. Its organization results from the following considerations: The chemical structure of macromolecular compounds should be independent of the method of synthesis; at least in the ideal case Part I is thus concerned with the chemical and physical structure of polymers. Properties depend on structure. Solution properties are thus discussed in Part II, solid state properties in Part III. There are other reasons for discussing properties before synthesis. For example, it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics, the gel effect without knowledge of the glass transition temperature etc. Part IV treats the principles of macromolecular syntheses and reactions.      Tappi Journal ,1985
