Synthetic Turf Sporting Surfaces:

The Science and Engineering of Sport Surfaces Sharon Dixon, Paul Fleming, Iain James, Matt Carré, 2015-06-05 Sports surface design is crucial for the successful performance of sports skills and the reduction of injury risk. Surfaces have developed from natural materials such as turf clay and cinder to synthetic surfaces such as acrylic tennis courts, artificial turf for soccer and synthetic running tracks while our understanding of natural turf has developed in terms of properties appropriate for different sports and surface sustainability. This book draws together the very latest research on biomechanical, medical and engineering approaches to the study of sports surfaces. Written by a team of leading international sport scientists, engineers and technologists, the book covers every key aspect of surface development and design, including surface behaviour, surface classification, function, construction and maintenance, influence of surfaces on player performance and injury, surface test methods and monitoring, development of natural turf and synthetic surfaces, shoe-turf interaction, future developments in sports surface technology. Representing the most comprehensive and up-to-date study of sports surfaces, this book is important reading for all researchers and professionals working in sports technology, sports engineering, biomechanics or sports medicine.

Novel Sustainable Raw Material Alternatives for the Textiles and Fashion Industry

Industry Subramanian Senthilkannan Muthu, 2023-08-31 Environmental impacts created by the textiles and fashion sector are well known and acknowledged by various stakeholders involved in the entire supply chain. The entire lifecycle of textile products creates various impacts to the environment and hence any attempts to alleviate the impacts are highly welcomed. The whole sector is keen to investigate novel sustainable alternatives in terms of raw materials, processes, approaches to make the entire textiles and fashion sector more sustainable. This broad title of novel sustainable alternatives can be split into three subtopics: novel raw material alternatives, novel process alternative and novel alternative approaches. This volume is dedicated to dealing with novel sustainable raw material alternatives for the textiles and fashion industry.
