Dynamic Resource Allocation in Embedded, High-Performance and Cloud Computing Leandro Soares Indrusiak, Piotr Dziurzanski, Amit Kumar Singh, 2022-09-01 The availability of many core computing platforms enables a wide variety of technical solutions for systems across the embedded high performance and cloud computing domains However large scale manycore systems are notoriously hard to optimise Choices regarding resource allocation alone can account for wide variability in timeliness and energy dissipation up to several orders of magnitude Dynamic Resource Allocation in Embedded High Performance and Cloud Computing covers dynamic resource allocation heuristics for manycore systems aiming to provide appropriate guarantees on performance and energy efficiency It addresses different types of systems aiming to harmonise the approaches to dynamic allocation across the complete spectrum between systems with little flexibility and strict real time guarantees all the way to highly dynamic systems with soft performance requirements Technical topics presented in the book include Load and Resource Models Admission Control Feedback based Allocation and Optimisation Search based Allocation Heuristics Distributed Allocation based on Swarm Intelligence Value Based Allocation Each of the topics is illustrated with examples based on realistic computational platforms such as Network on Chip manycore processors grids and private cloud environments

Communicating Process Architectures 2008 P. H. Welch, 2008 Communicating Process Architectures 2008 contains the proceedings of the thirty first Communicating Process Architectures Conference CPA 2008 organized under the auspices of WoTUG and the Department of Computer Science of the University of York The aim of this book is to cover both theoretical aspects and industrial applications of Communicating Processes Two invited speakers have given excellent contributions to this topic Professor

Samson Abramsky has worked in the areas of semantics and logic of computation and concurrency His work on game semantics considers interaction and information flow between multiple agents and their environment This has yielded new approaches to compositional model checking and to analysis for programs with state concurrency probability and other features Professor Colin O Halloran has been instrumental in the uptake of formal methods in the development and verification of high assurance systems on an industrial scale His research interests are in automating the use of formal methods and using these techniques at reasonable cost and on an industrial scale

Embedded Systems Handbook

Richard Zurawski, 2017-12-19 Considered a standard industry resource the Embedded Systems Handbook provided researchers and technicians with the authoritative information needed to launch a wealth of diverse applications including those in automotive electronics industrial automated systems and building automation and control Now a new resource is required to report on current developments and provide a technical reference for those looking to move the field forward yet again Divided into two volumes to accommodate this growth the Embedded Systems Handbook Second Edition presents a comprehensive view on this area of computer engineering with a currently appropriate emphasis on developments in networking and applications Those experts directly involved in the creation and evolution of the ideas and technologies presented offer tutorials research surveys and technology overviews that explore cutting edge developments and deployments and identify potential trends This second self contained volume of the handbook Network Embedded Systems focuses on select application areas It covers automotive field industrial automation building automation and wireless sensor networks This volume highlights implementations in fast evolving areas which have not received proper coverage in other publications Reflecting the unique functional requirements of different application areas the contributors discuss inter node communication aspects in the context of specific applications of networked embedded systems Those looking for guidance on preliminary design of embedded systems should consult the first volume Embedded Systems Design and Verification
