Systematic Introduction To Expert Systems Knowledge Representations And Problem Solving Methods:

Systematic Introduction to Expert Systems Frank Puppe, 2012-12-06 At present one of the main obstacles to a broader application of expert systems is the lack of a theory to tell us which problem solving methods are available for a given problem class. Such a theory could lead to significant progress in the following central aims of the expert system technique: Evaluating the technical feasibility of expert system projects. This depends on whether there is a suitable problem solving method and if possible a corresponding tool for the given problem class. Simplifying knowledge acquisition and maintenance. The problem solving methods provide direct assistance as interpretation models in knowledge acquisition. Also they make possible the development of problem specific expert system tools with graphical knowledge acquisition components which can be used even by experts without programming experience. Making use of expert systems as a knowledge medium. The structured knowledge in expert systems can be used not only for problem solving but also for knowledge communication and tutorial purposes. With such a theory in mind this book provides a systematic introduction to expert systems. It describes the basic knowledge representations and the present situation with regard to the identification, realization and integration of problem solving methods for the main problem classes of expert systems: classification, diagnostics, construction and simulation.

Knowledge Management and Acquisition for Smart Systems and Services Yang Sok Kim, Byeong Ho Kang, Deborah Richards, 2014-11-06 This book constitutes the proceedings of the 13th International Workshop on Knowledge Management and Acquisition for Intelligent Systems PKAW 2014 held in Gold Coast Qld Australia in December 2014. The 18 full papers and 4 short papers included in this volume were carefully reviewed and selected from 69 initial submissions. They deal with knowledge acquisition, expert systems, intelligent agents, ontology engineering, foundations of artificial intelligence, machine learning, data mining, Web mining, information systems, Web and other applications.

Fuzzy Logic in Intelligent System Design Patricia Melin, Oscar Castillo, Janusz Kacprzyk, Marek Reformat, William Melek, 2017-09-30 This book describes recent advances in the use of fuzzy logic for the design of hybrid intelligent systems based on nature inspired optimization and their applications in areas such as intelligent control and robotics, pattern recognition, medical diagnosis, time series prediction and optimization of complex problems. Based on papers presented at the North American Fuzzy Information Processing Society Annual Conference NAFIPS 2017 held in Cancun, Mexico from 16 to 18 October 2017, the book is divided into nine main parts, the first of which first addresses theoretical aspects and proposes new concepts and algorithms based on type 1 fuzzy systems. The second part consists of papers on new concepts and algorithms for type 2 fuzzy systems and on applications of type 2 fuzzy systems in diverse areas such as time series prediction and pattern recognition. In turn, the third part contains papers that present enhancements to meta heuristics based on fuzzy logic techniques describing new nature inspired optimization algorithms that use fuzzy dynamic adaptation of parameters. The fourth part presents emergent intelligent models which range from quantum algorithms to cellular automata. The fifth part explores applications

of fuzzy logic in diverse areas of medicine such as the diagnosis of hypertension and heart diseases The sixth part describes new computational intelligence algorithms and their applications in different areas of intelligent control while the seventh examines the use of fuzzy logic in different mathematic models The eighth part deals with a diverse range of applications of fuzzy logic ranging from environmental to autonomous navigation while the ninth covers theoretical concepts of fuzzy models
