Rajneesh Chowdhury, 2024-06-14 This book explores how the conceptual lens of Holistic Flexibility presents new advancements in systems thinking. Systems thinking is often associated with frameworks and methodologies that often confine the discipline to academic circles in operations research and management science. OR MS Holistic Flexibility for Systems Thinking and Practice challenges this status quo and talks about systems thinking as a state of mind giving it a cognitive character. The book presents both theoretical deliberations and practitioner cases of Holistic Flexibility. The development of systems thinking in OR MS is described leading to the latest debates on the subject and the key pillars of Holistic Flexibility are discussed in detail. A range of case studies are presented that offer a firsthand experience of Holistic Flexibility in practice. Learnings are drawn to highlight the importance of a spiritual approach in management and an understanding which is used to further develop the conceptual lens of Holistic Flexibility since it was first introduced. This book presents a range of competencies required for systems practitioners to address and respond to complex situations in an interconnected world. A bold attempt to pragmatize systems thinking and systems practice. The ideas presented in this book weave a thread between the development of the discipline, current debates and what lies ahead. It will be highly beneficial for OR MS researchers and graduate students who are interested in systems thinking as well as researchers interested in connecting modern management thinking and Eastern mysticism.

Holistic School Leadership whereby school leaders lead schools through systems thinking concepts and procedures. Facing growing complexity, change and diversity, school leaders need to regularly apply the systems view and perform at the systems level. This book proposes a holistic approach providing school leaders with systemic principles of action for excellence in education. What a wonderful book! Once I started it, I couldn't put it down. The book masterfully makes a systems leadership perspective accessible and grounded in the reality of the daily life of educators. Holistic School Leadership is a must read for anyone who has the responsibility for making schools better places, from professors to emerging teacher leaders. Karen Seashore, Louis Regents Professor of Organizational Leadership Policy and Development, University of Minnesota. Shaked and Schechter have constructed a much needed bridge to the future of educational leadership, a future of systemic thinking and positivity. Joseph Murphy, Professor of Education and Public Policy, Peabody College of Education, Vanderbilt University. Shaked and Schechter offer a comprehensive yet concise account of the meaning of systems thinking. The authors systematically develop their Holistic School Leadership approach with compelling examples, carefully attending to the perennial challenge of implementation. Important reading for scholars and practitioners of school leadership and management. James P. Spillane, Olin Professor in Learning and Organizational Change, Northwestern University. This is the most important book on systems thinking since Senge's 1990 seminal work on learning organizations. Shaked and Schechter demonstrate the critical and practical utility of systems thinking for school leaders, a must read for all reflective practitioners. Wayne K. Hoy, Professor

Emeritus The Ohio State University Holistic School Leadership provides an innovative and exciting look into a new perspective on educational leadership that holds tremendous potential in reshaping educational research policy and practice. The idea of interdependence alone makes this powerful new book required reading for anyone concerned with the future of education and educational leadership in particular. Give yourself your colleagues your students and your system the gift of the wisdom in this book. Alan J. Daly, Chair and Professor, Department of Education Studies, University of California, San Diego.

In this informative book, Shaker and Schechter offer a fresh application of systems thinking to schools and to the work of school leaders.
