**Computational Modeling and Simulation of Advanced Wireless Communication Systems** Agbotiname Lucky Imoize, Webert Montlouis, Mohammad S. Obaidat, Segun I. Popoola, Mohammad Hammoudeh, 2024-11-29 The book covers the exploitation of computational models for effectively developing and managing large scale wireless communication systems. The goal is to create and establish computational models for seamless human interaction and efficient decision making in beyond 5G wireless systems. Computational Modeling and Simulation of Advanced Wireless Communication Systems looks to create and establish computational models for seamless human interaction and efficient decision making in the beyond 5G wireless systems. This book presents the design and development of several computational modeling techniques and their applications in wireless communication systems. It examines shortcomings and limitations of the existing computational models and offers solutions to revamp the traditional architecture toward addressing the vast network issues in wireless systems. The book addresses the need to design efficient computational and simulation models to address several issues in wireless communication systems such as interference, path loss, delay, traffic outage, and so forth. It discusses how theoretical, mathematical, and experimental results are integrated for optimal system performance to enhance the quality of service for mobile subscribers. Further, the book is intended for industry and academic researchers, scientists, and engineers in the fields of wireless communications and ICTs. It is structured to present a practical guide to wireless communication engineers, IT practitioners, researchers, students, and other professionals.

**Quantitative Evaluation of Computing and Communication Systems** Heinz Beilner, Falko Bause, 1995-09-13 This book constitutes the proceedings of the 8th International Conference on Modelling Techniques and Tools for Computer Performance Evaluation (Performance Tools 95) and of the 8th GI/ITG Conference on Measuring Modelling and Evaluating Computing and Communication Systems (MMB 95) held jointly in Heidelberg, Germany, in September 1995. The volume presents 26 full refereed papers selected from a total of 86 submissions together with two invited contributions. The scope of the papers includes measurement and model-based approaches for quantitative systems assessment, reports on theoretical and methodological progress, and novel and improved assessment techniques and their tool implementations and applications.

**Higher National Computing** Howard Anderson, Sharon Yull, Bruce Hellingsworth, 2004-04-02 Higher National Computing 2e is a new edition of this extremely successful course book, updated specifically to cover the compulsory core units of the 2003 BTEC Higher National Computing schemes. Full coverage is given of the four core units for HNC, the two additional core units required at HND, and the Core Specialist Unit. Quality Systems, common to both certificate and diploma level. Students following the HNC and HND courses will find this book essential reading as it covers the core material they will be following through the duration of their course. Knowledge check questions and activities are included throughout, resulting in a clear and straightforward text which encourages independent study. Like the syllabus itself, this book is ideal for students progressing to HNC/HND from GNVQs.
