## **T Lymphocytes Structure Function And Choices:**

**T Lymphocytes** Franco Celada, Benvenuto Pernis, 2012-12-06 This volume contains the proceedings of the NATO Advanced Study Institute held in Porto Conte Alghero Sardinia September 15-27 1991. The ASI was attended by 86 graduate and postgraduate students from 18 different countries and was hosted by the newly founded International Laboratory of Molecular Genetics of Porto Conte directed by Prof. Marcello Siniscalco. The ASI was funded by NATO Scientific Affairs Division, the International Union of Immunological Societies, the European Community Directorate General for Science Research and Development, the Italian Research Council, and the San Raffaele Institute of Milano. In addition, a number of students who reside in the U.S. received travel funds from the U.S. National Science Foundation and the Turkish National Fund provided financial assistance to several students from Turkey. When we decided to organize a course on T lymphocytes, our concern was to reach a balance between the teaching of both the hard core principles and the latest experimental findings of cellular immunology and the recently expanded interfaces with the not yet known hypotheses, speculations, new projections to be born from the discussions.

The book contains information on new methodologies for sensitive amino acid analysis, N and C terminal sequence analysis, and protein and peptide purification. In

addition recent mass spectrometric approaches are described as an alternative technique to the common stepwise degradative sequence analysis of polypeptides by the Edman method The book presents new possibilities in the design of sequencers and sophisticated equipment for the structural analysis of peptides and proteins It describes practical approaches for the investigation of protein domains and protein complexes and contains review chapters on the crystallization of cell organelles as well as on recent theoretical aspects of protein folding mechanisms The nature of protein folding is not yet understood but further advances in this area would greatly enhance our present knowledge of protein structure and function Further the book gives examples of the application of gene technology to protein characterization and to the design of new proteins This enables new studies on the structure and function of proteins to be made and opens up efficient approaches to the design of drugs
