*Smoke and Tailings* Fredric L. Quivik, 2025-10-21 *Smoke and Tailings* explores the environmental history of copper smelting industry in Butte and Anaconda Montana. Situating within the emerging Envirotech field *Smoke and Tailings* blends environmental history and the history of technology. Author and historian Fredric L Quivik integrates these disciplines with political, legal, and business history to provide a comprehensive analysis of the industry's environmental legacy. Butte's history, a long-standing subject of historical inquiry, gains new depth as Quivik examines the technological developments pioneered by local mining companies. He challenges the simplistic narrative of a powerful corporation imposing its will on helpless agricultural communities. Local communities mounted strong opposition to the industry's polluting methods. Quivik acknowledges this dynamic while also revealing efforts by the Anaconda Copper Mining Company to address environmental issues. The company developed and implemented technical solutions to minimize resource waste and mitigate damage driven by both economic interests and litigation pressures. While these advancements lessened some of the environmental harm, they were insufficient to prevent long-term consequences. The operations in Butte and Anaconda ultimately created the largest Superfund complex in the United States, requiring billions of dollars in remediation. Quivik's nuanced approach opens the black box of technology, showing how innovations both alleviated and exacerbated the environmental challenges of mining, milling, and smelting. In addition to contributing to the rich literature on smelter smoke, this book breaks new ground by examining the underexplored environmental impacts of tailings, offering a fresh perspective on the intersection of industry, technology, and environmental change. The cultural landscapes of Butte and Anaconda retain many features of the region's history of both environmental degradation and remediation. *Smoke and Tailings* is an essential addition to the study of Butte's industrial and ecological history.

**The Codex of the Endangered Species Act, Volume II** Lowell E. Baier, John F. Organ, 2023-11-13 The Endangered Species Act of 1973 (ESA) is one of the most cherished and reviled laws ever passed. It mandates protection and preservation of all the nation's species and biodiversity, whatever the cost. It has been a lightning rod for controversy and conflicts between industry, business, and environmentalists. In this volume, leading Endangered Species Act experts interpret and propose legislative and administrative changes to prepare the ESA for future challenges. They explore regulations on avoiding harm to and producing benefits for species, cooperation between state and federal agencies, scientific analyses, and the necessary politics to enact their ideas. This is a call to action to chart an enlightened future for the Endangered Species Act that embraces the nation's moral commitment of 50 years ago to address species extinction constructively, mindful of biodiversity and as a fixture among the nation's values and needs. The interconnected web of life includes all living species that depend on each other for survival, us among them. The stakes our very future are too high to ignore.
