Tacit Knowledge In Professional Practice Reasearcher And Practitioner Perspectives:

Tacit Knowledge in Professional Practice Robert J. Sternberg, Joseph A. Horvath, 1999-02-01 Those responsible for professional development in public and private sector organizations have long had to deal with an uncomfortable reality Billions of dollars are spent on formal education and training directed toward the development of job incumbents yet the recipients of this training spend all but a fraction of their working life outside the training room in meetings on the shop floor on the road or in their offices Faced with the need to promote continuous learning in a cost effective manner trainers consultants and educators have sought to develop ways to enrich the instructional and developmental potential of job assignments to understand and facilitate the lessons of experience Not surprisingly social and behavioral scientists have weighed in on the subject of on the job learning and one message of their research is quite clear This message is that much of the knowledge people use to succeed on the job is acquired implicitly without intention to learn or awareness of having learned The common language of the workplace reflects an awareness of this fact as people speak of learning by doing or by osmosis and of professional instinct or intuition Psychologists more careful if not clearer in their choice of words refer to learning without intention or awareness as implicit learning and refer to the knowledge that results from this learning as tacit knowledge Tacit Knowledge in Professional Practice explores implicit learning and tacit knowledge as they manifest themselves in the practice of six knowledge intensive professions and considers the implications of a tacit knowledge approach for increasing the instructional and developmental impact of work experiences This volume brings together distinguished practitioners and researchers in each of the six disciplines to discuss their own research and or professional experience and to engage each other s views It addresses professional practice in its totality from the technical to the interpersonal to the crassly commercial not simply a few aspects of practice that lend themselves to controlled study Finally this edited volume seeks to go beyond the enumeration of critical experiences to an understanding of the psychological mechanisms that underlie learning from experience in professional disciplines and in so doing to lay a foundation for innovations in professional education and training

Renewing Professional Librarianship William A. Crowley,2008-03-30 Can professional librarianship exist let alone thrive in the 21st century Does accreditation protect the profession or reduce it to a minor component of information science The prognosis is not good claims cultural pragmatist Bill Crowley with worse to follow unless library studies and information studies are viewed as separate cognate areas While an information centric definition may be appropriate for corporate information specialists he notes that academic public and school librarians are already suffering the effects of devaluation The remedy is to embrace a concept called lifecycle librarianship the ability to meet crucial public needs from the lapsit to the nursing home by honing the library s time honored role as a vital resource for reading and lifelong learning and he concludes with a series of recommendations for library associations library and information education educators and practitioners and a challenge for the reader to do something with them **Quest** ,2006 Promoting Lifelong Learning for Older Workers Tarja Tikkanen,2006 This publication contains a number of essays which explore issues relating to population ageing and the needs of older workers from a lifelong learning perspective Although the focus is on European experiences it also includes contributions from Australia Japan and the United States The central argument of this book is that ageing must be seen as a lifelong learning and development process in which one continuously takes on new life challenges and in the context of work lifelong learning is understood as a broad holistic concept which encompasses individual education and training as well as participative workplace learning actively supported by employers
