Tacs Turn:

Brain Stimulation and Behavioral Change Claudio Lucchiari, Nicholas J. Kelley, Maria E. Vanutelli, Roberta Ferrucci, 2019-05-15 The eBook entitled *Brain Stimulation and Behavioral Change* is a collection of articles about the use of transcranial electric stimulation tES to change behaviors and face pathological conditions to enhance cognition and to explore cerebral functions using safe and non invasive brain modulation techniques The tESs include transcranial direct current stimulation tDCS transcranial alternate current stimulation tACS and due to the way it induces changes in the brain Transcranial Magnetic Stimulation TMS The use of tES has recently exploded Certainly one reason for this explosion of research is that it is a cheap way to change behavior However on the other hand we still know very little about the neural mechanisms that underlie tES The present eBook includes both original studies and reviews It covers a wide scope of arguments including studies aimed at testing the potential ability of tES in mitigating physical and psychiatric symptoms and to support neurological rehabilitation enhancing reading abilities motor abilities and creativity Furthermore some contributions about the role of tES in discovering and mapping the neuro functional correlates of higher cognitive functions are also included The common background of the contributions included in the eBook lies in the idea that we need sound scientific evidence about how to move these techniques from labs to real life contexts Addressing these issues and understanding the real potentialities of tES in clinical and non clinical applications require a significant cross fertilization between disciplines We hope this eBook will be able to boost the discussion on this vital topic
