

2.54GHz), which covers GSM900/PCS/WiFi/Bluetooth for mobile phone applications. The proposed antenna can radiate bi-directional patterns at all the operating frequency bands which is suitable for use in mobile phone and other wireless applications. The different steps followed in this study can be used to match this circuit for others frequency bands. At the end we have done a radiation test of the proposed antenna by associating it to an ARDUINO card which permits to send messages for a long distance using GSM network.

High Spectral Density Optical Communication Technologies Masataka Nakazawa, Kazuro Kikuchi, Tetsuya

Miyazaki, 2010-08-12 The growth of Internet traffic in recent years surpassed the prediction of one decade ago. Data stream in individual countries already reached terabits level. To cope with the petabit class demands of traffic in coming years, the communication engineers are required to go beyond the incremental improvement of today's technology. A most promising breakthrough would be the introduction of modulation formats enabling higher spectral efficiency than that of binary on-off keying scheme, virtually the global standard of fiber optic communication systems. In wireless communication systems, techniques of high spectral density modulation have been well developed, but the required techniques in optical frequency domain are much more complicated because of the heavier fluctuation levels. Therefore, the past trials of coherent optical modulation/detection schemes were not successful. However, the addition of high-speed digital signal processing technology is the fundamental difference between now and two decades ago, when trials of optical coherent communication systems were investigated very seriously. This approach of digital coherent technology has attracted keen interest among communication specialists, as indicated by the rapid increase in the pioneering presentations at the post-deadline sessions of major international conferences. For example, 32 terabits transmission in a fiber experiment based on this technology was reported in post-deadline session of Optical Fiber Communication Conference (OFC) 2009. The advancement of the digital coherent technologies will inevitably affect the network architecture in terms of the network resource management for the new generation photonic networks rather than will simply provide with huge transmission capacity. **Optical Fiber**

Telecommunications IV-B Ivan Kaminow, Tingye Li, 2002-05-22 Volume B is devoted to light wave systems and system impairments and compensation. Some of the topics include growth of the Internet network architecture, undersea systems, high-speed TDM transmission, cable TV systems, access networks, simulation tools, nonlinear effects, polarization mode dispersion, bandwidth formats, and more. This book is an excellent companion to *Optical Fiber Telecommunications IV-A: Components* (March 2002, ISBN 0 12 395172 0). Fourth in a respected and comprehensive series. Authoritative authors from a range of organizations. Suitable for active lightwave R & D designers, developers, purchasers, operators, students, and analysts. Lightwave components reviewed in Volume A; Lightwave systems and impairments reviewed in Volume B. Up to the minute coverage. *56th Appita Annual Conference* Appita Incorporated., Appita (Association : 1997-). Annual General Conference, 2002. Appita Inc. is the technical association serving the Australian and New Zealand pulp and paper industry. The 56th annual conference included 73 papers presented on various topics relating to the pulp and paper industry, ranging from the impact of wood source variability on pulping and papermaking processes to cost analysis for paper makers. Mechanics of Paper Products Sören Östlund, Kaarlo Niskanen, 2021-01-18 This book focuses on the mechanical properties and

performance of products made of fiber based materials It helps students to develop skills for solving problems of product performance and engineering challenges in product development Organized with a problem based approach practical examples of product performance are presented and the relevant mechanics are analyzed to deduce which material properties control the performance The new edition covers state of the art and green technologies as modeling of fiber networks and applications of nanocellulose

Metaheuristics for Dynamic Optimization Enrique Alba, Amir Nakib, Patrick Siarry, 2012-08-11 This book is an updated effort in summarizing the trending topics and new hot research lines in solving dynamic problems using metaheuristics An analysis of the present state in solving complex problems quickly draws a clear picture problems that change in time having noise and uncertainties in their definition are becoming very important The tools to face these problems are still to be built since existing techniques are either slow or inefficient in tracking the many global optima that those problems are presenting to the solver technique Thus this book is devoted to include several of the most important advances in solving dynamic problems Metaheuristics are the more popular tools to this end and then we can find in the book how to best use genetic algorithms particle swarm ant colonies immune systems variable neighborhood search and many other bioinspired techniques Also neural network solutions are considered in this book Both theory and practice have been addressed in the chapters of the book Mathematical background and methodological tools in solving this new class of problems and applications are included From the applications point of view not just academic benchmarks are dealt with but also real world applications in logistics and bioinformatics are discussed here The book then covers theory and practice as well as discrete versus continuous dynamic optimization in the aim of creating a fresh and comprehensive volume This book is targeted to either beginners and experienced practitioners in dynamic optimization since we took care of devising the chapters in a way that a wide audience could profit from its contents We hope to offer a single source for up to date
