How to Take Good Pictures Eastman Kodak Company,1995 Introduces techniques for taking better pictures provides guidelines for operating a camera and includes tips on photographing people animals and landscapes **Black & White Photography** Steve Pease,2017-06-13 To make a photograph it's best you need to explore the options to get the best look I almost always make all shots in color Then convert to black and white if the shot looks good in black and white That way you always have a color copy It's much harder to recolor a photo than take the color out if you ever want a color print of the shot I do take shots in black and white sometimes with my phone camera It is beneficial to see the shot in black and white many times It helps you learn to see shadows and tones in the shot different from when you see only in color It also makes texture pop out of the shot in a way you can't see in color Most people like to see photos in color most of the time It's the way most of us see everything That is a good thing but it can take away from some important things we should see There are situations where black and white is better In high contrast photos black and white can be much more interesting Making a shot black and white can also take a so-so shot and make it great Black and white photographs are very simplistic Taking out the color changes the focus The focus goes from the color to the composition and the creativity of the shot Color can distract from the shot It can take the focus away from the subject which is something you don't want to do Look at the shot in color What do you think it will look like without color Do you think it may look better without color Desaturate the shot and see what it looks like There are many ways to take out the color but to look the best you need to do a few more things than desaturate only We will get into that more later Why should you take photos in black and white There can be many subtle tone

differences you can't get in a color photo. Black and white can bring out your creativity more than with color. You see light differently in black and white than you do in color. Black and white brings out and emphasises emotion in the shot. Black and white highlights form patterns and negative space. Without color you see the interaction of the lines in the shot to bring out the shapes and forms. Flat light also has more options to make a shot interesting. Most flat light shots are boring. Black and white photos can be much more dramatic. Bringing out texture is much easier in black and white photography. Learning to shoot well in black and white will make you a better photographer when shooting in color. Shooting black and white makes you focus more on the composition. Color will not distract from the creativity or the emotion of the shot. You can create a certain mood in the shot you can't do in color. In this book I will give you tips on how to take the best black and white shots you can. I will show you how to use black and white to change the mood of the shot and create the emotion you want to portray. I have taken hundreds of thousands of photos over the past 40 years. Many have been black and white. I have studied photography in practice and photography school many years ago. Practice is the best way to learn. Learn by using your eyes and the tools you have to make the best shots you can. Take time and search black and white photos online. Look at the variety of shots. Look to see what type of look you prefer. Do you like high key, dramatic, middle shades of gray, infrared, or do you like it with a tint to the shot? Look at Ansel Adams' photography. Look at other great black and white shots and see how the photographer sees the light. Look at how they compose the shot to create the shot they want. If you haven't tried black and white, check it out and see what you can do. It's easy to make great shots if you learn what to look at.

Great Shot ! Michael Maher, 2014-01-05 It's not about the camera Strangers often try to compliment me by saying What a nice camera you must take great pictures mistakenly assuming camera gear is the primary reason for a photographer's success Indeed photographers typically invest in learning

how their cameras work but believe repeated trial and error is all that's needed to take great photos This seldom works A photographer's skilled eye is the most important factor in capturing superior photos not the camera equipment Knowledgeable photographers can shoot far better pictures with mediocre gear than an uninformed novice with state of the art equipment Unfortunately many shooters never train their photographer's eye Great Shot changes this by teaching a pro's approach to taking outstanding pictures Most professionals learn their skills by accompanying another pro on assignment to see how he/she does it Great Shot lets its readers virtually accompany me to see firsthand how I took my 100 best pictures learning the tricks of the trade that helped me win me over 25 professional photojournalism awards including 2 time New England Newspaper Photographer of the Year Train your eye to see what a professional photographer does Visualize the best photos for almost any situation Anticipate great photo opportunities before they occur Position yourself to react and capture the powerful images Create photos you can be proud of good enough to get published Discover hundreds of tips for making your own pictures professional quality by going on assignment with a professional photographer *Shooting Digital* Mikkel Aaland, 2007-02-12 A unique full color guide to the art of taking amazing photos with a digital camera Aimed at photographers of all levels and ranges of interest this new edition of Aaland's popular guide takes readers beyond the technology of the latest cameras and equipment to teach them the unique aesthetics of the digital image Helpful examples explain how to take full advantage of RAW file formats JPEG 2000 panorama automation and more Mikkel Aaland San Francisco CA is an award winning photographer and author whose photography has been published in magazines and exhibited around the world *Make Better Pictures* Henry Horenstein, 2018-11-06 Henry Horenstein may be the world's bestselling photography teacher with more than 700 000 copies of his photography manuals sold Now in this easily digestible book of wisdom he distills a career's worth of instruction into one hundred memorable pieces of advice Photography has never been a bigger part of our lives But how do you transform everyday snapshots into enduring images or merely upgrade your Instagram game With images illustrating the impact of each tip and with examples drawn from iconic artists Horenstein shows casual and expert photographers alike how to take the best photographs on every device from a DSLR to an iPhone

Good Pictures Kim Beil, 2020-06-23 A picture rich field guide to American photography from daguerreotype to digital We are all photographers now with camera phones in hand and social media accounts at the ready And we know which pictures we like But what makes a good picture And how could anyone think those old styles were actually good Soft focus yearbook photos from the 80s are now hopelessly and happily outdated as are the low angle portraits fashionable in the 1940s or the blank stares of the 1840s From portraits to products landscapes to food pics Good Pictures proves that the history of photography is a history of changing styles In a series of short engaging essays Kim Beil uncovers the origins of fifty photographic trends and investigates their original appeal their decline and sometimes their reuse by later generations of photographers Drawing on a wealth of visual material from vintage how to manuals to magazine articles for working

photographers this full color book illustrates the evolution of trends with hundreds of pictures made by amateurs artists and commercial photographers alike Whether for selfies or sepia tones the rules for good pictures are always shifting reflecting new ways of thinking about ourselves and our place in the visual world
