Hughes,2017-02-03 Music is a frequently neglected aspect of Japanese culture It is in fact a highly problematic area as the Japanese actively introduced Western music into their modern education system in the Meiji period 1868 1911 creating westernized melodies and instrumental instruction for Japanese children from kindergarten upwards As a result most Japanese now have a far greater familiarity with Western or westernized music than with traditional Japanese music Traditional or classical Japanese music has become somewhat ghettoized often known and practised only by small groups of people in social structures which have survived since the pre modern era Such marginalization of Japanese music is one of the less recognized costs of Japan s modernization On the other hand music in its westernized and modernized forms has an extremely important place in Japanese culture and society Beethoven s Ninth Symphony for example being so widely known and performed that it is arguably part of contemporary Japanese popular and mass culture Japan has become a world leader in the mass production of Western musical instruments and in innovative methodologies of music education Yamaha and Suzuki More recently the Japanese craze of karaoke as a musical entertainment and as musical hardware has made an impact on the leisure and popular culture of many countries in Asia Europe and the Americas This is the first book to cover in detail all genres including court music Buddhist chant theatre music chamber ensemble music and folk music as well as contemporary music and the connections between music and society in various periods The book is a collaborative effort involving both Japanese and English speaking authors and was conceived by the editors to form a balanced approach that comprehensively treats the full range of Japanese musical culture
