Zoology Paper I Federal Public Service Commission:

Wildlife Ecology: Conservation And Management Dr. Nadim Chishty, Dr. Habiba Bano, Mr. Narayan Lal Choudhary, Mr. Pushkar Kumawat, 2022-12-06 For the present purpose we may state that wildlife management means the management of animal populations within the framework of the environment Some would find it too narrow arguing that wildlife management should also include education outreach park management law enforcement economics and land appraisal since so many management issues are rooted in interactions between humans and animals Many of the most pressing questions in wildlife ecology may be reduced to numbers such as the rate of population increase the extent of dispersion or the effects of interactions with other species and the surrounding environment A conceptual grasp of quantitative ecology is necessary for dealing with these issues Because we can't always depend on experience to determine the most suitable options mathematical models are also a vital part of decision making in wildlife conservation and management The book also demonstrates that a comprehensive approach is necessary to deal with environmental problems as opposed to a piecemeal single pollutant or single medium approach *Report on the Federal Public Service Commission* Nigeria.
