manifests itself in medieval romance and medieval romances as objects themselves Medieval romance narratives glitter with the material objects that were valued and exchanged in late medieval society lovers rings and warriors swords holy relics and desirable or corrupted bodies Romance however is also a genre in which such objects make meaning on numerous levels and not always in predictable ways These new essays examine from diverse perspectives how romances respond to material culture but also show how romance as a genre helps to constitute and transmit that culture Focusing on romances circulating in Britain and Ireland between the twelfth and sixteenth centuries individual chapters address such questions as the relationship between objects and protagonists in romance narrative the materiality of male and female bodies the interaction
