Submarines Of The Royal Navy:

The Royal Navy Submarine Service Antony Preston, 2001 In 1901 Holland One the Royal Navy s first submarine was launched This is a day by day account of the history and achievements of the Royal Navy s submarines throughout their first 100 years of service It chronologically analyzes separate classes of submarine **The Submarine Service, 1900-1918** Nicholas Lambert, 2020-11-25 The year 2001 marks the centenary of the Royal Navy s submarine service In the aftermath of the 2016 celebrations of the Battle of Jutland centenary it is worth considering how the First World War at sea changed This volume opens with an examination of the background to the Board of Admiralty s decision in 1900 to buy submarines bringing to light documents that go a long way toward dispelling the myth that Britain s pre 1914 naval leaders were opposed to the development of the submarine as a major weapon Indeed the documents show that senior naval officers and influential civilians in Whitehall believed that the advent of the submarine would revolutionize naval warfare in a way that would bolster the Royal Navy s position as the world s predominant naval power This edited selection of documents illustrates not only the Admiralty s thinking on the employment of the submarine between 1900 and 1918 it also charts the technical development of British submarines and explains issues such as why the pioneer submariners came to regard themselves as an elite group within the Royal Navy and were allowed to become the silent service **The Royal Navy and Anti-submarine Warfare, 1917-49** Malcolm Llewellyn-Jones, 2006 An essential new account of how anti submarine warfare is conducted with a focus on both historic and present day operations This new book shows how until 1944 U boats operated as submersible torpedo craft which relied heavily on the surface for movement and charging their batteries This pattern was repeated in WWII until Allied anti submarine countermeasures had forced the Germans to modify their existing U boats with the schnorkel Countermeasures along also pushed the development of high speed U boats capable of continuously submerged operations This study shows how these improved submarines became benchmark of the post war Russian submarine challenge Royal Navy doctrine was developed by professional anti submarine officers and based on the well tried combination of defensive and offensive anti submarine measures that had stood the press of time since 1917 notwithstanding considerable technological change This consistent and holistic view of anti submarine warfare has not been understood by most of the subsequent historians of these anti submarine campaigns and this book provides an essential and new insight into how Cold War and indeed modern anti submarine warfare is conducted **Sub** Danny Danziger, 2011-08-04 300 million cubic miles of ocean Stealthy and deadly the nuclear submarines of the Royal Navy lie in wait in the depths of the world s oceans ready to listen intercept and attack wherever they may be needed from the coastline of Libya to the ice caps of the Arctic If the UK is hit by a devastating nuclear strike they ll be the last military force standing 200 million pounds of hardware Award winning journalist Danny Danziger has been allowed unprecedented access to the elite crew of one of the UK s attack class submarines joining them on operations and hearing their stories Unrestricted and uncompromising Sub

paints a vivid picture of this fascinating little known branch of our armed forces One incredible hunter killer In an increasingly unstable world these are the people who keep us safe It is time for the silent service to be heard X.1 Roger Branfill-Cook,2013-01-21 The X stood for experimental but it might equally have meant extraordinary exotic or extravagant as this giant submarine attracted superlatives the world s largest most heavily armed and deepest diving submersible of the day X 1 was a controversial project conceived behind the backs of the politicians and would remain an unwanted stepchild As British diplomats at the Washington naval conference were trying to outlaw the use of submarines as commerce raiders the Admiralty was designing and building the world s most powerful corsair submarine to destroy single handed entire convoys of merchant ships This book explores the historical background to submarine cruisers the personalities involved in X 1 s design and service the spy drama surrounding her launch the treason trial of a leading RN submarine commander the ship s chequered career and her political demise Despite real technical successes she would finally fall foul of black propaganda aimed at persuading foreign naval powers that the cruiser submarine did not work even today uninformed opinion repeats the myth of her failure However it was completely ignored by other navies who went on building submarine cruisers of their own some larger than but none so sophisticated as X 1 The book analyses in detail the submarine cruisers built by the US Navy the French and the Japanese plus the projected German copy of X 1 the Type XI U Boat paying belated tribute to the real importance of the mysterious X 1 **Observer's Directory of Royal Naval Submarines, 1901-1982** Maurice

Cocker,1982 **Royal Navy Submarines** Maurice Cocker,2008-10-30 This is a must buy for the Royal Navy and Submarine enthusiast being a complete directory of RN submarines from the outset to the present day There is a wealth of detail on each class Every entry contains the specification launch dates of individual boats details of evolving construction and armament and other salient information in a compact form The high quality of the drawings of the majority of classes adds to the value of this work which includes the very latest Astute submarines currently coming into service This book is a complete directory of submarines and will be widely welcomed by all with an interest professional or lay in the subject **The Royal Navy List Or Who's who in the Navy** ,1916 The Royal Navy's Submarine Service , *His Majesty's Submarines* ,1997

Seek & Strike Willem Dirk Hackmann,1984 This is the first history of the Royal Navy s part in research in underwater acoustics Between 1914 and 1954 the submarine evolved into an underwater warship whose most dangerous weapon was its ability to hide in a mass of water Of the many techniques that were tried to deprive it of that advantage those based on sonar have been the most effective At the beginning of the First World War the British Navy had almost no means of tackling the danger of German U boats The use of hydrophones underwater microphones proved of limited value and in 1917 work began on the development of an active detection device This was based on French research into the capacity of certain crystals to act as transmitters and receivers of high frequency sound waves These move about four times faster through water than through air but their exact speed varies with temperature pressure and salinity and as scientists discovered these differ

considerably in different parts of the oceans Another complication is that as sound travels away from whatever has produced it its energy diminishes As a result of this and of the distortion caused by reflection from both surface and sea bed the echo from a target has only a fraction of the energy of the transmitted sound impulse In the mid 1920s experiments were begun with magnetostrictive transducers first used in the British Navy s attack sonar sets after the Second World War They in turn have for certain purposes been replaced by electrostrictive ceramic transducers In 1919 the average echo range was about 457m 500 yds in the Second World War it was about 1 2km 1300 yds at the end of this history it had increased to several miles This book through careful research has brought together in a clear and absorbing way the different aspects of British naval development the impact of tactical and strategic needs on that development the evolution of sonar and the transformation of small scale technical research into a complex organisation involving government and industry back of book
