Synthetic Worlds Esther Leslie, 2006-01-16 This revealing study considers the remarkable alliance between chemistry and art from the late eighteenth century to the period immediately following the Second World War Synthetic Worlds offers fascinating new insights into the place of the material object and the significance of the natural the organic and the inorganic in Western aesthetics Esther Leslie considers how radical innovations in chemistry confounded earlier alchemical and Romantic philosophies of science and nature while profoundly influencing the theories that developed in their wake She also explores how advances in chemical engineering provided visual artists with new colors surfaces coatings and textures thus dramatically recasting the way painters approached their work Ranging from Goethe to Hegel Blake to the Bauhaus Synthetic Worlds ultimately considers the astonishing affinities between chemistry and aesthetics more generally As in science progress in the arts is always assured because the impulse to discover is as immutable and timeless as the drive to create

Synthetic Worlds ,2005    **Synthetic Frontiers** Kim De Wolff, 2025-11-11 How an imaginary island became the symbol of contemporary concern for ocean plastic pollution A floating plastic island has become a powerful symbol of ocean pollution but no one can find it at sea While marine scientists dismiss the trash island as myth Synthetic Frontiers argues that its persistence is a consequence of dominant ways of knowing and exploiting the Pacific Ocean Bringing feminist science and technology studies approaches to materiality together with hydrohumanities critiques of terracentrism Kim De Wolff shows how ocean plastic pollution is shaped by land water divides and the fluidities that defy them The trash island is no mere misrepresentation It is a synthetic frontier a territorial line of control that emerges with the products of modern science and transforms crises of petrocapitalism into landscapes of so called progress As such the story of the trash island a story where knowledge and awareness of global ecological problems so often fail to instigate meaningful change is simultaneously about the persistence of plastic pollution and all its associated harms Where cleanup solutions recycle plastic into ever more polluted landscapes De Wolff proposes radically reclaiming synthetics from modern chemistry and modern philosophy in a refusal of elemental frontiers
