System Of Social Science Papers Relating To Adam Smith:

A System of Social Science Andrew S. Skinner, 1979 The second edition of this guide to Adam Smith's system of thought has been fully updated to reflect recent developments in Smith scholarship and Professor Skinner's experience of teaching Smith to a student audience. The material from the first edition has been extensively rewritten and four new chapters have been added covering Smith's essays on the exercise of human understanding and his relationship to Francis Hutcheson, David Hume and Sir James Steuart. Skinner places Smith's system of social and moral science firmly within the context of contemporary British and Continental intellectual history dealing in particular detail with the founders of the Scottish Enlightenment and with the French Physiocrats

[Adam Smith and Modernity](#) Alberto Burgio, 2023-03-20 This volume features 19 original chapters on Adam Smith's conception of modernity. The contributions demonstrate the relevance of Smith as the great interpreter of modernity 250 years after the publication of *The Wealth of Nations*. The chapters in Part 1 focus on structural aspects of Smith's work. They cover topics such as Smith as the theorist of a spontaneous order, the systematic dimension of Smith's theoretical construction and Smith's role as a historian of economic thought. Part 2 addresses Smith's conception of modern subjectivity between *Lectures on Rhetoric* and *Belles Lettres*, *Theory of Moral Sentiments* and *Wealth of Nations*. Here the contributors consider the figure of the Smithian merchant and the importance of ridicule and satire for understanding modern civility and comment on the role of sympathy, imagination and moral judgement in developing a sense of self, the condition of the modern man in society and the virtue of self-command. Part 3 focuses on the crucial question of the relationship between ethics and economics discussing the link between efficiency, equity and justice, the nature of Smith's theory of value and the ethical connotation of Smith's critique. Part 4 deals with topics inherent to the functional dynamics and development process of the Smithian commercial society. These topics include law and authority, the relationship between work and freedom, the parable of the poor man's son and the economic and political consequences of the new secular orthodoxy. Finally the chapters in Part 5 explore themes related to history and the Smithian idea of progress. They focus on the link between trade and progress of civilization, Smith's modern sociological vision of mass commercial societies, Smith's judgement on savage and premodern societies and the controversial question of the immanentistic or providentialist perspective from which Smith considers both the social dynamics and the historical process.

mercantilist the last in a long line stretching back to the 16th century He advocated the entire armoury of mercantilist policies the regulation of foreign trade to induce an inflow of gold the promotion of industry by inducing cheap raw material imports protective duties on imported manufactured goods encouragement of exports particularly finished goods because they are labour intensive control of the size of population by emigration and immigration to keep wages low all capped by a denial of Hume s argument that an inflow of gold will only raise prices and thus drive gold abroad
