Systematics of Western North American Butterflies Thomas C. Emmel, 1998 **Lepidoptera of North America: Butterflies of Oregon, their taxonomy, distribution, and biology**, 2005 Scientific Names List for Butterfly Species of North America, North of Mexico Paul A. Opler, Andrew D. Warren, 2002 *The California Deserts* Bruce M Pavlik, 2008-07-02

This highly readable spectacularly illustrated compendium is an ecological journey into a wondrous land of extremes The California Deserts explores the remarkable diversity of life in this harsh yet fragile quarter of the Golden State In a rich narrative it illuminates how that diversity created by drought and heat has evolved with climate change since the Ice Ages Along the way we find there is much to learn from each desert species whether it is a cactus pupfish tortoise or bighorn sheep about adaptation to a warming arid world The book tells of human adaptation as well and is underscored by a deep appreciation for the intimate knowledge acquired by native people during their 12 000 year desert experience In this sense the book is a journey of rediscovery as it reflects on the ways that knowledge has been reclaimed and amplified by new discoveries The book also takes the measure of the ecological condition of these deserts today presenting issues of conservation management and restoration With its many sidebars photographs and featured topics The California Deserts provides a unique introduction to places of remarkable and often unexpected beauty *Annotated List of the Lepidoptera of Alberta, Canada* Greg Pohl, Gary Anweiler, Christian Schmidt, Norbert Kondla, 2010-03-05 This checklist of the Lepidoptera butterflies and moths of Alberta lists 2367 species reported to occur in the province as well as 138 species whose occurrence in Alberta is probable Each species entry includes adult flight time and distribution status in the Cordilleran Boreal and Grasslands ecozones as well as references to taxonomic works and to the literature and public collection sources of the records Detailed notes on taxonomy nomenclature distribution habitat and biology are given for 1524 of the listed species An additional section provides details on 171 species erroneously reported from Alberta in previous works The authors hope it will be a useful resource for anyone carrying out species level work on Lepidoptera in western Canada or taxonomic work on Lepidoptera in general An introductory section provides a general overview of the order Lepidoptera and the natural regions of Alberta and the history and current state of knowledge of Alberta Lepidoptera Each of the 63 families and selected subfamilies occurring in Alberta is briefly reviewed with information on distinguishing features general appearance and general biology The list is accompanied by an appendix of proposed nomenclature changes consisting of revised status for 25 taxa raised from synonymy to species level and new synonymy for 20 species level and one genus level taxa here considered to be subjective synonyms with resultant revised synonymy for one taxon and formalization of seven new combinations

Moths of Western North America Jerry A. Powell, Paul A. Opler, 2009-05-27 Insects boast incredible diversity and this book treats an important component of the western insect biota that has not been summarized before moths and their plant relationships There are about 8 000 named species of moths in our region and although most are unnoticed by the public

many attract attention when their larvae create economic damage eating holes in woollens infesting stored foods boring into apples damaging crops and garden plants or defoliating forests In contrast to previous North American moth books this volume discusses and illustrates about 25% of the species in every family including the tiny species making this the most comprehensive volume in its field With this approach it provides access to microlepidoptera study for biologists as well as amateur collectors About 2 500 species are described and illustrated including virtually all moths of economic importance summarizing their morphology taxonomy adult behavior larval biology and life cycles
