**Mark Steyvers**

## **Systematics Of The Pleurothallidinae:**

**Systematics of the Pleurothallidinae** Alfonso Doucette, 2017 A supermatrix was constructed based on one nuclear ribosomal gene ITS one low copy nuclear gene phyC and three plastid genes matK trnL F ycf1 for two data sets A 166 species data set was analyzed under Maximum Likelihood ML and Bayesian Analysis Patterns of evolution of the traits were then inferred based on our phylogenetic reconstructions An abbreviated stem was identified as the juvenile stage across the Pleurothallidinae based on seedlings of fourteen species and as a paedomorphic trait that evolved independently in several lineages The trait bivalvate capsule dehiscence was newly recognized as an apomorphy with at least two transitions to multivalvate capsule dehiscence The results of the ML analysis of the 166 species data set were used for an SH like topology test to determine whether the monophyly of non monophyletic genera could be rejected The results of a ML analysis of a 665 species data set are also provided A targeted phylogeny based on Genotyping by Sequencing data was necessary in order to resolve relationships among the Lepanthes s l subclades The impact the proposed change will have on botanists and horticulturalists was evaluated based on the ability for researchers to search the literature relevant to the genera the frequency of genera offered by 339 orchid nurseries across 43 different countries and the number of registered horticultural hybrids A review of the taxonomic treatment of the genera based on Index Kewensis is also provided The results of our phylogenetic analyses topology tests literature review taxonomy review and the synapomorphy of a pedicel articulated with the column foot support the expansion of Pleurothallis to include all genera embedded within it However we propose that nine major subclades be recognized as genera based on robust support for their monophyly shared morphological trends simplification of the taxonomy and the comparatively small impact the name changes would have on the horticultural and botanical community at large compared to an expansion of Pleurothallis      Systematics of the Pleurothallidinae , 1986
